But, as it turns out, art and cultural crime is currently ranked as the third-largest criminal enterprise in the world. What exactly is art crime? Why does art matter? And what is law enforcement doing to prevent this crime today? Due to the misleading portrayal of art crime in the entertainment industry people have the flawed belief that art and cultural crime doesn't damage anyone in a direct way. And the truth of the matter is that this crime results in the loss of billions of dollars annually. Art and cultural crime is not simply focused on museums or private displays, the loss of art directly affects our cultural identity and history. Napoleon moved from one region to the next collecting art and sending as much as possible back to France. The Nazis looted cultural property from every territory they occupied. And there have been various cases of ISIL and ISIS destroying archaeological sites as a method of destroying any evidence of past culture or history that disagree with their own. With the United States being the largest market for both legal and illicit artwork in the world more preventative attention from law enforcement and security is needed for our country to meet international standards and end detrimental art crimes. In Stealing History, Colleen Clarke and Eli J. Szydlo look at the history behind art crime, how these crimes have grown over the last half century, and what law enforcement has been involved in protecting the world from these crimes.Rooted in the creative success of over 30 years of supermarket tabloid publishing, the Weekly World News has been the world's only reliable news source since 1979. Using unforgettable accounts of both famous and little-known Americans, Under God examines the stories of men and women who forged our nation. Against these, they pair the dark side of America's legacy--racism, slavery, injustice--in order that a new generation might seek God's face and avoid repeating sins of the past. The authors draw on the resources of WallBuilders, a national organization that distributes historical, legal, and statistical information and helps citizens become active in their communities.Ein unerbitlicher FBI-Agent jagt einen teuflischen Mörder. Imagine James Bond meets Sherlock Holmes: Counterterrorism and Cybersecurity is the sequel to Facebook Nation in the Total Information Awareness book series by Newton Lee. The book examines U.S. counterterrorism history, technologies, and strategies from a unique and thought-provoking approach that encompasses personal experiences, investigative journalism, historical and current events, ideas from great thought leaders, and even the make-believe of Hollywood. Demystifying Total Information Awareness, the author expounds on the U.S. intelligence community, artificial intelligence in data mining, social media and privacy, cyber attacks and prevention, causes and cures for terrorism, and longstanding issues of war and peace. The book offers practical advice for businesses, governments, and individuals to better secure the world and protect cyberspace. It quotes U.S. Navy Admiral and NATO's Supreme Allied Commander James Stavridis: "Instead of building walls to create security, we need to build bridges." The book also provides a glimpse into the future of Plan X and Generation Z, along with an ominous prediction from security advisor Marc Goodman at TEDGlobal 2012: "If you control the code, you control the world." Counterterrorism and Cybersecurity: Total Information Awareness will keep you up at night but at the same time give you some peace of mind knowing that our problems are manmade "therefore they can be solved by man [or woman]," as President John F. Kennedy said at the American University commencement in June 1963. Myth of "Free Media" and Fake News in the Post-truth Era reveals the story of "fake news" hysteria and myth of "free media" in the post-truth world order, starting from the question of whether there has really been a "truth" era. The book examines how the news media is battling for relevance in the age of Internet. It shows how the wave of media "liberalization" has weakened the basic premise of Libertarian Media Function Theory, which states that the media is the "Fourth Estate" that protects the citizens from abuse of power by the government. It analyses how excessive commercialization of the media and the commodification of news has changed journalism globally. The book recommends a new paradigm and explains how it can be used to transform news reporting from an adversarial model to a human-centric one. Focuses on twenty-five true stories behind the "Law and Order Special Victims Unit" television series; describing the criminal process and the real people involved in some of the nation's most notorious crimes. The recognized authority in this field and an established bestseller, this eagerly awaited 17th edition features a 40-page color section. Die Erinnerungen von Ex-FBI-Chef James B. Comey sind aktuell, brisant und spannend wie ein Krimi. 2017 von Präsident Trump gefeuert, schreibt Comey einen fesselnden Insider-Bericht über politische Machenschaften und das von Donald Trump korruptierte System. Ein Sachbuch wie ein Kriminalroman der Extraklasse: James Comeys bresante Erinnerungen an die vergangenen 20 Jahre im Zentrum der Macht zeigen ihn als unbeugsamen Ermittler, der gegen die Mafia, gegen CIA-Folter und NSA-Überwachung, und zuletzt im Wahlkampf 2016 gegen Hillary Clintons Umgang mit dienstlichen Emails und Donald Trumps Russland-Verbindungen vorgegangen ist. Der Weg des parteilosen New Yorker Vorzeigeturisten gleicht einer politischen Achterbahnfahrt: stellvertretender Justizminister unter George W. Bush, zum FBI-Direktor ernannt von Barack Obama und gefeuert von Donald Trump wegen angeblicher Inloyalität. Sein Buch ist ein eindrückliches Lehrstück über den aufrechten Gang in einer verantwortungslosen Regierung. In October 1931, Dick Tracy made his debut on the pages of the Detroit Mirror. Donald Trump's first term as the 45th President of the United States of America has shocked the world. His attitudes towards Islam became a key point of contention on the campaign trail, and in power Trump has continued his war of divisive words and deeds. Here, acclaimed journalist Lawrence Pintak scrutinizes America's relationship with Islam since its foundation. Casting Donald Trump as a symptom of decades of misunderstanding and demonization of the Islamic world, as well as a cause of future tensions, Pintak shows how and why America's relationship with the world's largest religion has been so fractious, damaging and self-defeating. Featuring unique interviews with victims and perpetrators of Trump's policies, as well as analysis of the media's role in inflaming debate, America & Islam seeks to provide a complete guide to the twin challenges of terrorism and the polarizing rhetoric that fuels it, and sketches out a future based on co-operation and the reassertion of democratic values. Readers will learn what it takes to succeed as an FBI special agent. The book also explains the necessary educational steps, useful character traits, potential hazards, and daily job tasks related to this career. Sidebars include thought-provoking trivia. Questions in the backmatter ask for text-dependent analysis. Photos, a glossary, and additional resources are included. A bold and original argument that upends the myth of the Fifties as a decade of conformity to celebrate the solitary, brave, and stubborn individuals who pioneered the radical gay rights, feminist, civil rights, and environmental movements, from historian James R. Gaines. In a fascinating and beautifully written series of character portraits, The Fifties invokes the accidental radicals--people motivated not by politics but by their own most intimate conflicts--who sparked movements for change in their time and our own. Among many others, we meet the legal pathfinder Pauli Murray, who was tortured by both her mixed-race

heritage and her [in between] sexuality. Through years of hard work and self-examination, she turned her demons into historic victories. Ruth Bader Ginsberg credited her for the argument that made sex discrimination illegal, but that was only one of her gifts to 21st-century feminism. We meet Harry Hay, who dreamed of a national gay-rights movement as early as the mid-1940s, a time when the US, Soviet Union, and Nazi Germany viewed gay people as subversives and mentally ill. And in perhaps the book's unlikely pairing, we hear the prophetic voices of Silent Spring's Rachel Carson and MIT's preeminent mathematician, Norbert Wiener, who from their very different perspectives—she in the living world, he in the theoretical one—converged on the then-heretical idea that our mastery over the natural world carried the potential for disaster. Their legacy is the environmental movement. The Fifties is a dazzling and provocative work of history that transforms our understanding of a seemingly staid decade and honors the pioneers of gay rights, feminism, civil rights, and environmentalism. The book carries the powerful message that change actually begins not in mass movements and new legislation but in the lives of de-centered, often lonely individuals, who learn to fight for change in a daily struggle with themselves.
