The Routledge Handbook of English for Academic Purposes
With the growth of information technology, many new communication channels and platforms have emerged. This growth has advanced the work of crowdsourcing, allowing individuals and companies in various industries to coordinate efforts on different levels and in different areas. Providing new and unique sources of knowledge outside organizations enables innovation and shapes competitive

advantage. Crowdsourcing: Concepts, Methodologies, Tools, and Applications is a collection of innovative research on the methods and applications of crowdsourcing in business operations and management, science, healthcare, education, and politics. Highlighting a range of topics such as crowd computing, macrotasking, and observational crowdsourcing, this multi-volume book is ideally designed for business executives, professionals, policymakers, academicians, and researchers interested in all aspects of crowdsourcing.

Lack of Experience in Teaching English for Specific Purposes (ESP) at Vocational Training Centres in Misrata With the unrelenting spread of globalization, the English language has been firmly established as the Lingua Franca. Now more than ever, the importance of learning English is paramount within nearly all professional and educational sectors. English for Specific Purposes (ESP) has long been accepted as an effective method for teaching English as a foreign language. In recent years, it has experienced an increasing presence in secondary and tertiary education across the globe. This is predominantly due to its learner-centered approach that focuses on developing linguistic competence in the student's specific discipline, may that be academics, business or tourism, for example. Positioning English for Specific Purposes in an English Language Teaching Context attempts to present and define the relevance and scope of ESP within English Language teaching. From mobile phones as educational tools to the language needs of medical

students, the contributors to this volume examine and propose different epistemological and methodological aspects of ESP teaching. Its unique approach to ESP marks this volume out as an important and necessary contribution to existing ESP literature, and one that will be of use to both researchers and practitioners of ESP.

Integrating Information and Communication Technologies in English for Specific Purposes This book provides a practical and accessible update of major developments in ESP today.

Research Questions in Language Education and Applied Linguistics Offers a wide-ranging overview of the issues and research approaches in the diverse field of applied linguistics Applied linguistics is an interdisciplinary field that identifies, examines, and seeks solutions to real-life language-related issues. Such issues often occur in situations of language contact and technological innovation, where language problems can range from explaining misunderstandings in face-to-face oral conversation to designing automated speech recognition systems for business. The Concise Encyclopedia of Applied Linguistics includes entries on the fundamentals of the discipline, introducing readers to the concepts, research, and methods used by applied linguists working in the field. This succinct, reader-friendly volume offers a collection of entries on a range of language problems and the analytic approaches used to address them. This abridged reference work has been compiled from the most-accessed entries from The

Encyclopedia of Applied Linguistics

(www.encyclopediaofappliedlinguistics.com), the more extensive volume which is available in print and digital format in 1000 libraries spanning 50 countries worldwide. Alphabetically-organized and updated entries help readers gain an understanding of the essentials of the field with entries on topics such as multilingualism, language policy and planning, language assessment and testing, translation and interpreting, and many others. Accessible for readers who are new to applied linguistics, The Concise Encyclopedia of Applied Linguistics: Includes entries written by experts in a broad range of areas within applied linguistics Explains the theory and research approaches used in the field for analysis of language, language use, and contexts of language use Demonstrates the connections among theory, research, and practice in the study of language issues Provides a perfect starting point for pursuing essential topics in applied linguistics Designed to offer readers an introduction to the range of topics and approaches within the field, The Concise Encyclopedia of Applied Linguistics is ideal for new students of applied linguistics and for researchers in the field.

Asian Research on English for Specific Purposes As an annual event, The 3rd INTERNATIONAL CONFERENCE ON ADVANCE & SCIENTIFIC INNOVATION (ICASI) 2020 continued the agenda to bring together researcher, academics, experts and professionals in examining selected theme by applying multidisciplinary approaches. In 2020, this event

will be held in 20 June at Garuda Plaza Hotel Medan. The conference from any kind of stakeholders related with Management, Economy, Administration Business, Tourism, Policy, Law, Operation Management and all research in Social Science and Humanities. Each contributed paper was refereed before being accepted for publication. The double-blind peer reviewed was used in the paper selection.

English for Specific Purposes This book proposes a new paradigm for English language teaching based on concepts from English for Specific Purposes (ESP) research and applications as well as from growing evidence relating pattern recognition to language learning ability. The contributors to the volume argue that learners should not try to become proficient all-around users of 'idealistic native-like' English, but instead should be realistic about what they need to acquire and how to go about achieving their specific goals. The book discusses the present situation by describing the status quo of English language education in Japan, taking into consideration recent trends of CLIL (content and language integrated learning), EMI (English medium instruction), and TBLT (task-based language teaching) as well as the work done on the Common European Framework of Reference for Languages (CEFR). It introduces new movements in ESP in Japan and in other Asian regions, covering topics ranging from genre analysis to corpus linguistics, and presents application examples of ESP practice in a range of educational situations in Japan from the graduate school level to elementary and middle

school contexts. It also offers readers application examples of ESP practice in a range of business settings and expands the discussion to the global sphere where EAP and ESP are gaining importance as the number of ELF (English as a Lingua Franca) speakers continue to increase. The book will be of great interest to academics, researchers, and post-graduate students working in the fields of EFL and ESL.

Needs Analysis for Language Course Design Economic and societal systems continually evolve as the needs and demands of society change. With the development of new technologies, research, and discoveries, various opportunities emerge for venture development and developing economies. Crowdfunding and Sustainable Urban Development in Emerging Economies provides innovative research on current issues in the rise of new platforms for digital activities, a collaborative economy, crowdsourcing, crowdfunding, and other activities that are shaping developing countries. Highlighting a range of pertinent topics, such as infrastructure finance, tertiary educational institutions, and urban sustainability, this book is an important resource for academicians, practitioners, researchers, and students.

The changing face of ESP in today's classroom and workplace Featuring a collection of newly commissioned essays, edited by two leading scholars, this Handbook surveys the key research findings in the field of English for Specific Purposes (ESP). • Provides a state-of-the-art

overview of the origins and evolution, current research, and future directions in ESP • Features newly-commissioned contributions from a global team of leading scholars • Explores the history of ESP and current areas of research, including speaking, reading, writing, technology, and business, legal, and medical English • Considers perspectives on ESP research such as genre, intercultural rhetoric, multimodality, English as a lingua franca and ethnography

Language for Specific Purposes The context for the teaching and learning of English for specific disciplinary purposes is undergoing profound changes under the influence of economic globalization and new digital communication technologies. English in the Disciplines demonstrates how fundamental principles of ESP, to tailor language learning materials to the needs of specific groups of learners, can be adapted to new contexts of learning in the digital age. Based on sustained research into students' experiences in an ESP context in Hong Kong, this volume provides an empirically grounded and practical methodology to ESP learning and course design and features: • mixed-method case studies; • links between theory and practice, with plentiful examples of teaching materials and learning activities; • recognition of the effect of new technologies and globalization on the practice of ESP, highlighting problems and providing practical solutions; • a new pedagogical model for ESP course design, addressing multiple dimensions relevant to today's ESP learners

including learner autonomy, genre, multimodality and digital literacies, plurilingual practices, and project-based learning and collaboration. English in the Disciplines provides key reading for anyone studying and researching this topic.

Introducing English for Specific Purposes The central objective of this study is to create a proposal for the development of the present English for Specific Purposes (ESP) course at Health Sciences Colleges (HSCs) in Saudi Arabia on the basis of a needs analysis and a course evaluation. It attempts to evaluate the ESP course and to investigate the needs of two groups of stakeholders, viz. ESP students and health professionals, as perceived in the first case by the students themselves, by their language teachers and by the course administrators and in the second case by graduates of the ESP course now working in health professions and by other medical staff. A mixed-methods approach was adopted: 246 questionnaires were administered to current students, graduates and language teachers; semi-structured interviews were conducted with 6 students, 7 graduates, 6 language teachers, 5 course administrators, 5 hospital managers and 11 English-speaking health professionals; and document analysis was employed as an ancillary research method. The triangulation of data collection tools, sources and places helps to increase the validity and reliability of the findings. The data collected from the documents and interview transcriptions were analyzed qualitatively by hand, while

those collected from the questionnaires were analyzed quantitatively using the SPSS program. Findings of the language needs analysis show that all four of the language skills were important, both for the students' academic studies and for their target careers. Generally speaking, the evaluation results indicate that while the ESP course was effective to some extent, it had some limitations including its curriculum organization and syllabus specifications, the teaching-learning materials used and the assessment procedures adopted. Accordingly, this study proposes a new ESP curriculum based on the students' needs. The study also recommends the provision of teacher training and the recruitment of additional ESP teaching staff as first steps towards the necessary improvements. It is also concluded that the collection of multiple types of data from various sources and places is necessary to overcome many of the problems commonly associated with needs analysis and evaluation studies.

Developing Courses in English for Specific Purposes English for Specific Purposes (ESP) has accumulated substantial tradition in practice, research and theory. It is a common approach in English Language Teaching (ELT) among adults today, starting with high schools, then in academia, pre and in-service training, and life-long learning programs. The role of ESP in each of these is to facilitate work in today's inevitably international business and scientific environment. It provides language training based on the precise simulation of communicative situations found in the

surroundings for which learners are preparing, including, for example, domain specific vocabulary, syntactic and morphological structures, text and speech content structuring, stylistics, intercultural competence. At present, when English is present either as a foreign or second language, learning General English (GE) is to a large degree accomplished before learners start needing English for their jobs. In this way, ESP does not complete GE, but builds upon the foundations laid by it in learners' prior education. ESP is a channel of communication for the contemporary academia and economics. However, even so, these are still early days for ESP, as it does not yet have a recognised place within academia. Only very recently have we begun to witness the occasional but encouraging emergence of ESP academic courses and departments. This book thus explores practice and research conducted and under way in this field of ELT in order to assist its recognition as an autonomous academic discipline.

Establishing Predominance of English for Specific Purposes within Adult English Language Teaching Introducing Course Design in English for Specific Purposes is an accessible and practical introduction to the theory and practice of developing ESP courses across a range of disciplines. The book covers the development of courses from needs analysis to assessment and evaluation, and also comes with samples of authentic ESP courses provided by leading ESP practitioners from a range of subject and global contexts. Included in this book are: The basics of ESP course design

The major current theoretical perspectives on ESP course design Tasks, reflections and glossary to help readers consolidate their understanding Resources for practical ESP course development Examples of authentic ESP courses in areas such as business, aviation and nursing Introducing Course Design in English for Specific Purposes is essential reading for pre-service and in-service teachers, and students studying ESP and applied linguistics.

Towards a New Paradigm for English Language Teaching Despite the growth and development of English for Specific Purposes (ESP) as an area of study since the 1960s, few books related to classroom applications in combination with other disciplines such as Content and Language Integrated Learning (CLIL), English Language Teaching (ELT), or English as a Medium of Instruction (EMI), exist. Each section of this volume includes scholarly written studies from across the globe, indicating the extent and the importance ESP has in the current academic world. Filling the present void in available material on this subject, this book contains various useful and effective applications of ESP, teaching activities for classroom settings, as well as insights on how ESP can be combined with, and adopted by, other disciplines. Written from a variety of backgrounds and perspectives, this text is sure to contribute to this field and will be of interest to ESP teachers, as well as postgraduate and undergraduate students.

Crowdfunding and Sustainable Urban Development in

Emerging Economies Transformation and Empowerment through Education challenges the normalisation of Western discourses as the optimal choice for empowering education. The book aims to reconstruct our relationship with education and employs contemporary theories in order to understand some of the most persistent phenomena in contemporary education and its role in our lives. Written by professionals with experience of a wide range of academic and institutional conventions and traditions, and from diverse ethnocultural backgrounds, this book effectively presents a global perspective on educational practices, both inside and outside the classroom. The range of topics covered includes equity, access, inclusivity, social justice, leadership and the internationalisation of teaching. This book, based on empirical studies using key methodologies, is ideal for academics and postgraduate researchers interested in critical pedagogy, educational studies and educational linguistics, as well as educators and policymakers around the world.

Der Naumburger Meister - Bildhauer und Architekt im Europa der Kathedralen An essential toolkit for language teachers who need to design language courses for working professionals, vocational schools, undergraduate and graduate students. Needs Analysis for Language Course Design is a handbook for those who prepare and teach courses in ESP. The book shows the reader how needs analysis can be used to create a detailed profile of the professional learner and how this profile can then be used

to tailor make a course in language and communication for working professionals and for those studying towards a professional or vocational qualification.

Introducing Course Design in English for Specific Purposes In the United States today there is lively discussion, both among educators and employers, about the best way to prepare students with high-level language and cross-cultural communication proficiency that will serve them both professionally and personally in the global environment of the twenty-first century. At the same time, courses in business language and medical language have become more popular among students. Language for Specific Purposes (LSP), which encompasses these kinds of courses, responds to this discussion and provides curricular models for language programs that build practical language skills specific to a profession or field. Contributions in the book reinforce those models with national survey results, demonstrating the demand for and benefits of LSP instruction. With ten original research-based chapters, this volume will be of interest to high school and university language educators, program directors, linguists, and anyone looking to design LSP courses or programs in any world language.

Positioning English for Specific Purposes in an English Language Teaching Context English for Specific Purposes (ESP) is one of the most needed forms of English Language Teaching with regards to the adult population in today's

global market economy where the English language is a prerequisite for the exchange and communication of professional ideas, best practices, and experiences, and a necessary skill for advancement in one's career. This comprehensive volume brings together the most insightful papers from the First International Conference on Teaching English for Specific and Academic Purposes, titled "Connect and Share", held at the Faculty of Electronic Engineering of the University of Niš, Serbia, in May 2013. The collection covers a diverse and extensive list of topics, and provides a number of invaluable contributions which prove the presence of ESP in all continents, and in many different professions, sciences, and businesses. Also of interest is the fact these papers highlight the interrelatedness of ESP and linguistics, the methodology of teaching, sociolinguistics, and a number of other fields relevant to the study and practice of languages. The chapters of this book prove that immense, original, creative and worthwhile research is being conducted in the ever-growing and increasingly relevant field of ESP. At the same time, the book also offers rich insights into many innovative teaching practices that justify ESP as an important area of academic study.

English in the Disciplines English for Specific Purposes offers the teacher a new perspective on this important field. The main concern is effective learning and how this can best be achieved in ESP courses. The authors discuss the evolution of ESP and its position today; the role of the ESP teacher; course design; syllabuses; materials; teaching methods, and

evaluation procedures. It will be of interest to all teachers who are concerned with ESP. Those who are new to the field will find it a thorough, practical introduction while those with more extensive experience will find its approach both stimulating and innovative.

UPRT 2007: Empirical Studies in English Applied Linguistics
This book fills the need for a text that integrates Information and Communication Technologies (ICTs) into English for Specific Purposes (ESP). It offers insights on current methodological principles in ESP in both academic and professional contexts, drawing on authentic teaching and learning situations, and analyses best practice guidelines. Part I begins with ESP pedagogical principles and technological practice in order to focus on its two main branches: English for Academic Purposes, which includes linguistic skills and students' needs, and English for Occupational Purposes, specifically looking at Business, Medical and Translators courses. This book is a great resource for ESP researchers, educators and students, because it provides case studies of how ICTs can be used in English for multiple purposes. Authors present their experiences of integrating tools into their instructions, with each chapter contributing unique pedagogical implications.

Working with Language This volume encompasses the range of research questions on language-related problems that arise in language teaching, learning and assessment. The [150] chapters are written by experts in the field who

*each offer their insights into current and future directions of research, and who suggest several highly relevant research questions. Topics include, but are not limited to: language skills teaching, language skills assessment and testing, measurement, feedback, discourse analysis, pragmatics, semantics, language learning through technology, CALL, MALL, ESP, EAP, ERPP, TBLT, materials development, genre analysis, needs analysis, corpus, content-based language teaching, language teaching and learning strategies, individual differences, research methods, classroom research, form-focused instruction, age effects, literacy, proficiency, and teacher education and teacher development. The book serves as a reference and offers inspiration to researchers and students in language education. An important skill in reviewing the research literature is following a study's "plan of attack." Broadly, this means that before accepting and acting upon the findings, one considers a) the research question (Is it clear and focused? Measurable?), b) the subjects examined, the methods deployed, and the measures chosen (Do they fit the study's goal and have the potential to yield useful results?), and c) the analysis of the data (Do the data lead to the discussion presented? Has the author reasonably interpreted results to reach the conclusion?). Mohebbi and Coombe's book, *Research Questions in Language Education and Applied Linguistics: A Reference Guide*, helps budding researchers take the first step and develop a solid research question. As the field of language education evolves, we need continual research to improve our instructional and*

assessment practices and our understanding of the learners' language learning processes. This book with its remarkable 150 topics and 10 times the number of potential research questions provides a wealth of ideas that will help early career researchers conduct studies that move our field forward and grow our knowledge base. Deborah J. Short, Ph.D., Director, Academic Language Research & Training, Past President, TESOL International Association (2021-22) As a teacher in graduate programs in TESOL I frequently come across the frustration of students at centering their research interests on a particular topic and developing research questions which are worth pursuing so as to make a contribution to the field. This frustration stems from the fact that our field is so vast and interrelated, that it is often impossible to properly address all that interests them. Hence, I wholeheartedly welcome this most relevant and innovative addition to the research literature in the field of TESOL and Applied Linguistics. Coombe and Mohebbi have created a real tour de force that stands to inform budding researchers in the field for many years to come. Additionally, the cutting-edge depiction of the field and all it has to offer will no doubt update the research agendas of many seasoned researchers around the world. The 150 chapters are organized in a most powerful, yet, deceptively simple way offering a positioning within the topic, suggesting questions that might direct inquiry and offering a basic set of bibliographic tools to start the reader in the path towards research. What is more, the nine sections in which the chapters are organized leave no area of the field

*unexplored. Dr. Gabriel Díaz Maggioli, Academic Advisor,
Institute of Education, Universidad ORT del Uruguay,
President, IATEFL*

Chinese for Specific and Professional Purposes

*Introducing Needs Analysis and English for Specific
Purposes CONTRIBUTIONS TO THE SOCIOLOGY OF
LANGUAGE brings to students, researchers and practitioners
in all of the social and language-related sciences carefully
selected book-length publications dealing with
sociolinguistic theory, methods, findings and applications. It
approaches the study of language in society in its broadest
sense, as a truly international and interdisciplinary field in
which various approaches, theoretical and empirical,
supplement and complement each other. The series invites
the attention of linguists, language teachers of all interests,
sociologists, political scientists, anthropologists, historians
etc. to the development of the sociology of language.*

*ICLLE 2019 The Routledge Handbook of English for
Academic Purposes provides an accessible, authoritative
and comprehensive introduction to English for Academic
Purposes (EAP), covering the main theories, concepts,
contexts and applications of this fast growing area of
applied linguistics. Forty-four chapters are organised into
eight sections covering: Conceptions of EAP Contexts for
EAP EAP and language skills Research perspectives
Pedagogic genres Research genres Pedagogic contexts*

Managing learning Authored by specialists from around the world, each chapter focuses on a different area of EAP and provides a state-of-the-art review of the key ideas and concepts. Illustrative case studies are included wherever possible, setting out in an accessible way the pitfalls, challenges and opportunities of research or practice in that area. Suggestions for further reading are included with each chapter. The Routledge Handbook of English for Academic Purposes is an essential reference for advanced undergraduate and postgraduate students of EAP within English, Applied Linguistics and TESOL.

Crowdsourcing: Concepts, Methodologies, Tools, and Applications This proceedings book captures a wide range of timely themes for readers to be able to foresee the digital era's impact on English teaching in non-English speaking countries. English used in the global environment, the frequent mobile communication, and the use of AI-based translators are bringing about dramatic changes in our English language learning and teaching. Who can provide us the wisdom to know what to do? Those scholars going through these complex environmental changes! A collection of puzzle pieces may bring us a better contour for the future than a perfectly edited book. It's indeed a pleasure reading these insightful pieces to gain wisdom for the future of ELT practices in global contexts.

Ideas and Options in English for Specific Purposes English for Specific Purposes (ESP), addressing the communicative

needs and practices of particular professional or occupational groups, has developed rapidly in the past fifty years and is now a major force in English language teaching and research. This critical volume helps innovate the theory, practice, and methodology for ESP teaching and research in Asian countries and areas. Promoting communication and enhancing cooperation on ESP research and pedagogy across cultures, it provides ESP scholars, educators and practitioners with an opportunity to benefit from each other's research and expertise in an age of globalization and digitalization. The volume provides an in-depth analysis of the latest scholarship on English teaching and research for general and specific academic and occupational purposes; the intercultural communication in ESP contexts; corpus linguistics and data-driven instruction for ESP; computer-assisted language learning and mobile-assisted language learning; evaluation of English writing courses; and ESP translation strategies.

Evaluating Second Language Courses Typically, books on evaluation in the second and foreign language field deal with large programs and often result from large-scale studies done by the authors. The challenge for ordinary second and foreign language classroom teachers is that they must extrapolate techniques or strategies for evaluation from a very large scale to a much smaller scale, that of the course. At the same time, classroom teachers are responsible for outcomes of their courses and need to do evaluation on a scale and for needs of their choosing.

Evaluating Second Language Courses is designed for classroom teachers who are dealing with a single course, and who wish to understand and improve some aspect of their course.

Vistas of English for Specific Purposes As an annual event, International Conference on Language, Literature, and Education in Digital Era (ICLLE) 2019 continued the agenda to bring together researcher, academics, experts and professionals in examining selected theme by language, literature and education in digital era. In 2019, this event held in 19-20 July 2019 at Padang, Indonesia. The conference from any kind of stakeholders related with Language and literature especially in education. Each contributed paper was refereed before being accepted for publication. The double-blind peer reviewed was used in the paper selection.

The Concise Encyclopedia of Applied Linguistics

Developments in English for Specific Purposes This volume presents a range of views about language, learning, and teaching in English for Specific Purposes (ESP). Its purpose is to go beyond individual cases and practices to examine the approaches and ideas on which they are based. The aim is for readers to adopt an analytical stance toward the field and to identify current perspectives in ESP and the ideas driving them. Ideas and Options in English for Specific Purposes does not promote any one approach, but rather

identifies and illustrates those in evidence today. The main emphasis is on the links between theory and ESP teaching and research. Ideas from linguistics, sociolinguistics, education, SLA, and social theories are described. Links are then made between these ideas and ESP course designs, instructional materials, and research projects. Thus the book moves back and forth between descriptions of theories, teaching practice, and research. Part I introduces the book's approach to description of ESP and the framework used to investigate it. Part II examines ideas of language, learning, and teaching in ESP. Recognizing that ESP is taught in many different countries and contexts, the author draws on a wide range of examples of teaching practice and research from around the world and from different branches of ESP, including English for Academic Purposes, English for Professional Purposes, and English for Vocational Purposes. From Chapter 3 onward, each chapter includes Questions for Discussion and Projects, to encourage readers to research and analyze the practices of ESP in their own contexts and to consider the ideas they draw on in their own teaching. This text is geared toward graduate-level TESOL education courses.

Components of Task-Based Needs Analysis of the ESP Learners with the Specialization of Business and Tourism Document from the year 2007 in the subject Didactics - Common Didactics, Educational Objectives, Methods, Misurata University, language: English, abstract: This paper focuses on teaching English for Specific Purposes (ESP). ESP

works to provide learners with the focal point of the course process that ESP learners need in their majors. The aim of this work is to enhance the awareness of the teachers who are involved in teaching ESP programmes. The study is divided into three chapters. The First Chapter investigates the problem and hypothesis of the study on the assumption that the teachers of Vocational Institutes are not capable to teach the textbook as an ESP course. Since the study deals with the Third Year Classes in Misurata Vocational Institutes, a look at the textbook syllabus is given. Chapter Two gives an analysis of the results of the teachers' the classroom observation, as they are the practical part of the study. Finally, Chapter Three presents the conclusions of the study followed by some recommendations.

The Handbook of English for Specific Purposes A compendium of the latest developments in research regarding English language education for Chinese-speaking learners, this volume combines cutting-edge research from multiple internationally-known scholars. The chapters offer unique insights into some of the most salient issues related to this broad topic. The seventh volume in the Global Research on Teaching and Learning English series, co-published with The International Research Foundation for English Language Education (TIRF), this book features chapters with original research written by TIRF Doctoral Dissertation Grant awardees. The volume addresses the crucial and growing need for research-based conversations on the contexts, environments, goals, and measures of

success for Chinese-speaking learners of English. It includes sections on language assessment, perceptions in university contexts, and technology, especially in relation to young learners, in order to promote in-depth discussion of the teaching and learning of English for native speakers of Chinese. The volume's 13 research-based chapters discuss topics such as the impact and implications of using emerging assessment tools; the increase in English for Specific Purposes (ESP) courses; academic speaking and writing; and teaching in an online or hybrid environment. Throughout the book the authors draw on their knowledge of their multiple contexts, as well as their learners' needs and goals. This volume brings together innovative research for TESOL and TEFL students, language teacher educators, language policy specialists, language assessment scholars, and language teachers. Readers will become familiar with how these issues related to Chinese-speaking learners of English are being addressed in academic circles around the world.

ELT in Asia in the Digital Era: Global Citizenship and Identity Introducing Needs Analysis and English for Specific Purposes is a clear and accessible guide to the theoretical background and practical tools needed for this early stage of curriculum development in ESP. Beginning with definitions of needs analysis and ESP, this book takes a jargon-free approach which leads the reader step-by-step through the process of performing a needs analysis in ESP, including: how to focus a needs analysis according to the

course and student level; the selection and sequencing of a wide variety of data collection procedures; analysis and interpretation of needs analysis data in order to write reports and determine Student Learning Outcomes; personal reflection exercises and examples of real-world applications of needs analysis in ESP. Introducing Needs Analysis and English for Specific Purposes is essential reading for pre-service and in-service teachers, and students studying English for Specific Purposes, Applied Linguistics, TESOL and Education.

Developing an ESP Curriculum for Students of Health Sciences Through Needs Analysis and Course Evaluation in Saudi Arabia This edited book focuses on current practices, challenges and innovations in the emerging field of English for Specific Purposes (ESP). By combining diverse, empirically-proven and innovative ESP practices from all over the world with inspiring theoretical input and reflections from experienced practitioners, the authors in this volume examine both best-practice examples and ESP programmes which by various metrics are deemed to have failed. This book will be of interest to practitioners, teacher educators and researchers working in the field of ESP, as well as readers interested in language education and curriculum development more broadly.

Chinese-Speaking Learners of English This book is a textbook for the English for Specific Purposes (ESP) course that can be used by lecturers and students in universities.

Taken from ESP books and journal sources from the internet which are developed based on the teaching syllabus in universities, especially in the English department. This book contains theories about ESP, types and components of ESP along with the development of course design in ESP. It is hoped that this book can become a source of teaching and reference for lecturers and students who need ESP books both for study and for research.

English For Specific Purposes (ESP) Presented in two parts, this book firstly introduces core considerations in ESP course development drawing on examples from a wide range of ESP and EAP courses. Secondly four case studies show how experienced ESP teachers and course developers went about developing courses to meet the needs of their particular learners.

Revisiting the Assessment of Second Language Abilities: From Theory to Practice This book presents an overview of revisiting the assessment of language abilities. It also showcases how the measurement of such constructs can result in negative or positive washback and how outcomes might be conducive to repercussions that decide on the future of many stakeholders. The 23 chapters were selected among tens of chapters received from different contexts that addressed the issue of revisiting the assessment of language abilities, such as Tunisia, Ukraine, Algeria, Russia, KSA, Sudan, Egypt, Canada, Kurdistan, UK, USA, Iran, Turkey, etc. These contexts have highlighted the necessity

to revisit the different constructs which should be assessed with a clear and straightforward foundation on students' learning objectives and their actual language ability. To do so, most of the chapters present hands-on use of relevant statistical tests that might serve in revisiting the construct definition both theoretically and operationally. Perhaps the sole and intricate question that the authors of these contributions ask is what it means to revisit the assessment of the construct of individualized language ability and how. In addition, the book accentuates the momentousness and significance of reflecting on test fairness and validation as the mainspring and backbone for democratization of assessment. This book appeals to a broad readership, such as English Language Teaching (ELT) practitioners, language teachers, students, testing organizations, policy-makers, test designers, writers of test specifications, testing experts, researchers, program evaluators, especially in the Middle East and North Africa (MENA) as well as other international contexts.

ICASI 2020 This book, likely the first of its kind in the English language, explores Chinese for specific and professional purposes (CSP) in terms of theorizing and developing practical applications for language teaching and learning. While research in language for specific purposes is thriving for languages such as English, there has been comparatively little such research conducted for Chinese. This volume attempts to fill the gap by bringing together practitioners from a broad international scholarly

community, who share common interests yet diverse orientations. Seventeen papers are included, and address four broad thematic categories: (1) academic Chinese, (2) business Chinese, (3) Chinese for medicine and health care, and (4) Chinese for other broadly defined services and industries (diplomacy, tourism, wine-tasting, etc.). Representing the state of the art in CSP research, the book offers an indispensable guide for anyone interested in theoretical and practical issues in this area of applied Chinese language studies.

A Kaleidoscope of Models and Strategies for Teaching English to Speakers of Other Languages Introducing English for Specific Purposes presents the key concepts and practices of ESP in a modern, balanced, and comprehensive way. This book defines ESP and shows how the approach plays a crucial role in the world of English language teaching. Explaining how needs analysis, language and learning objectives, materials and methods, and evaluation combine to form the four main pillars of ESP, the book includes: practical examples that illustrate how the core theories and practices of ESP can be applied in real-world academic and occupational settings; discussion of some of the most hotly debated issues in ESP; insights on how ESP courses can be organized and integrated to form a complete program; reflection boxes, practical tasks, extension research questions, and resources for further reading in each chapter. Introducing English for Specific Purposes serves as an ideal textbook for graduate and

advanced undergraduate students studying courses on English for Specific Purposes or English for Academic Purposes, as part of degrees in English for Specific Purposes, Education, ELT, Applied Linguistics, TESOL or TEFL. This comprehensive publication is also an invaluable reference resource for pre-service and in-service teachers of ESP, and for English program managers and administrators.

English for Specific Purposes Instruction and Research In the following paper we shall thoroughly analyze the target learning needs of the learners within an ESP (English for Specific Purposes) context. The main concerns of ESP have always been and remain with the needs analysis, text analysis and preparing learners to communicate effectively in the tasks prescribed by their study or work situation. It is often said that ESP lacks an underlying theory. We believe that a theory of ESP could be outlined based on either the specific nature of the texts that learners require, or on the basis of target needs-related nature of the teaching. For this reason an ESP teacher is required to implement some analysis concerning the target needs and the learning needs within the scope of teaching ESP as an integral part of the instruction. The aim of this paper is to cover a number of corresponding issues and steps towards the uptake of some successful task-oriented methodological tools for the development of linguistic skills within communicative instructions of ESP.
