Major changes in the way work is done and how organizations operate in the new global economy demand that employees find and develop new strategies for managing their jobs and careers. Not only is this necessary for their own success, it is also necessary for the success of their organizations. Sims, Veres, and the contributors to this timely, provocative volume identify the forces that act on employees and provide concrete examples and advice on how employees can better understand and respond to change and how they can actually benefit from it. Written with the employee in mind, the book will be important for specialists in human resource management, training and development, and others throughout the organization who have critical responsibilities for its survival and growth.

Neil J. Salkind guides readers through the fundamentals of tests and measurement, using the conversational writing style and straightforward presentation techniques that have made his book *Statistics for People Who (Think They) Hate Statistics* an international bestseller. He provides an overview of the design of tests, the use of tests, and some of the basic social, political, and legal issues that the process of testing involves. The Second Edition includes more opportunities to practice, and end-of-chapter sections that apply the material to everyday concerns regarding the assessment of behavior.

Counseling Assessment and Evaluation

This book is about successful work adjustment and relates to anybody who is working or about to go to work. Work adjustment refers to an employee being successful at his/her job and finding satisfaction with his/her work (thus company and job). This book doesn't glamorise work success but makes it realistic and attainable by breaking work success down into concrete steps (meaning concrete actions and/or behaviours). The central premise is to take charge of yourself and of the work environment rather than being a passive participant.

Designed to help students learn how to assess clients, conduct treatment planning, and evaluate client outcomes, this practical book addresses specific CACREP competencies. Incorporating case studies and examples, authors Joshua C. Watson and Brandé Flamez provide foundational knowledge for sound formal and informal assessments, cover ethical and legal considerations in assessment, describe basic statistical concepts, highlight the domains in which assessments are commonly used (intelligence, aptitude, achievement, personality, career, etc.), and provide strategies for integrating assessment data when working with clients. Counseling Assessment and Evaluation is part of the SAGE Counseling and Professional Identity Series, which targets specific competencies identified by CACREP (Council for Accreditation of Counseling and Related Programs). Kenya Gazette

This "undeniably moving and emotionally true" debut novel offers the emotional complexity and narrative scope of A Visit from the Goon Squad and resonates with the strong mystical nature of Swamplandia (Publishers Weekly, starred review) Most of us have experienced what it's like to know what someone is going to say right before they say it. Or perhaps you have been shocked by the irrefutable phenomena of coincidence, when your life intersects with another's in the most unlikely way. In gripping prose marked by stark simplicity, Another Place You've Never Been by debut novelist Rebecca Kauffman explores the intersection of human experience amidst the minutiae of everyday life. In her mid-thirties and still living in her hometown Buffalo, NY, Tracy spends most days at the restaurant where she works as a hostess, despite her aspirations of a career that would make use of her creative talents. Tracy's life is explored not only through her own personal point of view, but also through the viewpoints of other characters, wherein Tracy may only make a peripheral appearance or even emerge at different periods in her life. At its core, Another Place You've Never Been is a broad investigation of such bold ideas as the possibility that any person, at any time, in any place, could find themselves shivering in the presence of great and ancient forces; and the notion that love is perhaps "far less voluntary" than we might

believe it to be.
