A very topical book. Organiser Weekly Since the late 1980s, Vietnam, Cambodia, PDR Lao, and Myanmar have been opening their economies to international trade and investment. With the exception of Myanmar, the reforms have yielded impressive results, but the process is far from complete. In this enlightening book, a group of leading scholars outline the continuing reform efforts needed to survive the current global recession and place these economies in a competitive position on the recovery of the world economy. In the aftermath of the global financial crisis of 2008, this topical book analyses the opportunities and threats to continued globalization for the Mekong 4, particularly in relation to rapid industrialization through joining the production networks of East Asia. It then assesses the political will for sustaining the reform process. This book will be an important resource for national government agencies, such as the department of foreign affairs and aid agencies that have significant bilateral relationships with the Mekong 4 namely, Australia, Canada, Japan, Scandinavia, and the USA. International financial institutions that have existing (or potential) business links with the Mekong 4 as well as universities with courses in development economics will warmly welcome this book. Now in its Eleventh Edition, this trusted text continues the tradition of excellent coverage of theoretical nursing concepts, step-by-step skills and procedures, and clinical applications to assist beginning LPN/LVN nursing students in acquiring a solid foundation for their course of study. International aviation is a massive and complex industry that is crucial to our global economy and way of life. Fundamentals of International Aviation, designed for the next generation of aviation professionals, flips the traditional approach to aviation education. Instead of focusing on one career in one country, it has been designed to introduce the aviation industry on a global scale with a broad view of all the interconnected professional groups. Therefore, this is an appropriate introductory book for any aviation career (including aviation regulators, maintenance engineers, pilots, flight attendants, airline managers, dispatchers, air traffic controllers, and airport managers among many others). Each chapter of this text introduces a different cross-section of the industry, from air law to operations, security to remotely-piloted aircraft (drones). A variety of learning tools are built into each section, including case studies that describe an aviation accident related to the content of each chapter. This book provides a foundation of aviation industry awareness that will support the next generation as they choose a career path that best aligns with their interests and ambitions. It also offers current professionals an enriched understanding of the practices and challenges between the many interconnected professional groups that make up the rich fabric of international aviation. "I honestly feel that every incoming student nurse should have a copy of the Fundamentals Success book because it familiarizes students with what their fundamental tests will be like. Who wouldn't benefit from knowing what their test is going to look like? Being prepared with Fundamentals Success meant I hit the ground running. I aced my first test when most of my classmates were facing their first ever-academic failures. Nursing school is nothing like anything I have ever done before, memorizing text books will do little to prepare you to be a critical thinker. To succeed you must be able to apply the knowledge in multi-step processes the nursing process! The FA Davis books take you there and they do it quickly, because we nursing students needed to know it yesterday!" —Corrie Cyre, Hillsborough Community College Southshore, Student Nurses Association President Bring the principles of nursing to life and build a foundation for success from the classroom to the clinical setting. Die Autorin unterscheidet zwischen dem pflegerischen Wissen einer qualifizierten professionellen Krankenpflegerin und dem Basiswissen für Pflege im privaten Bereich. The World Development Report 2003 addresses how to lift from poverty the three billion people now living in severe deprivation. It also explores how to improve the quality of life for everybody today and for the two billion more who will join mankind in the next thirty years. Substantial increases in growth and productivity will be necessary to achieve this goal. The current scale of economic activity and speed of change is such that ecosystem and social structures cannot keep up. The Report puts forth two main messages: the first point is that enhancing prosperity and reducing poverty requires better care of the planet's ecosystem and social fabric. And secondly, that stronger collective action at all levels--from local to global--is essential for generating and scaling up the institutions that can transform growth.
