Frequency and Conductivity. Metal objects in the ground all conduct electricity better or worse. This may be plotted on a scale from Ferrous iron on the low side to Non Ferrous silver on the high side with gold and foil somewhere in the middle. This is often the basis for the LCD screen layout as you can see on the Garrett Ace.Geotech Page 1 While most people have no idea what's inside the control box of a metal detector, many actually have a misper- ception of what's in the disc at the other end of the pole, and how it works. In this article we'll take a peak inside. Electromagnetics Many detectorists refer to the coil as an antenna. It is not, at least in the classical way that antennas are used.
