Blackstone's Statutes on Commercial and Consumer Law 2013-2014

This volume gives coverage of UK and international intellectual property law, containing all the up-to-date legislation relevant to undergraduate law degrees.

Blackstone's International Law Documents

The European Convention on Human Rights is the most successful system for the enforcement of human rights in the world. However, to date its full potential for protecting children's rights has not been explored as attention has focused on the UN Convention on the Rights of the Child. This unique book provides the first analysis of the extensive case law of the Commission and the Court of Human Rights on all issues concerning children and their rights. This study is important as a study of the regional protection of children's rights and, moreover, the case law itself can be directly applied in the legal system of nearly every European country, including the UK. The book includes chapters on the rights of the child under the European Convention on Human Rights in relation to education, protection from abuse, the right to identity, child care, juvenile justice, health care and immigration and the family. It also explores the potential of the Strasbourg mechanism for the protection of children's rights and thus provides a practical and vital guide to the study and use of the European Convention in the broad area of children's rights.

Blackstone's Statutes on Contract, Tort and Restitution 2014-2015

This Handbook is the latest version of a book that was last published in 2003, and has been completely revised to take account of the innumerable legal developments since then. The book contains 26 chapters on topics ranging across the full spectrum of civil, political, social, economic and environmental rights, with particular emphasis on the right not to be discriminated against. It is currently the most comprehensive and practical publication on the state of human rights in Northern Ireland. This is a part of the world where, as well as ongoing issues arising out of the conflict ('emergency laws' are still in place, for example), there are familiar questions concerning the rights of people with poor mental health, the law relating to family and sexual matters, children's rights, education rights, employment rights, housing rights, and social security rights. The contributors to the book are all experts in their field, most of them with years of experience as human rights activists and advisers. The book provides precise information about relevant legislation and case law (on which there are tables) and is fully indexed.

Blackstone's Statutes on Family Law 2013-2014

This book provides a clear and detailed examination of why it is so difficult to secure comprehensive political engagement and actionable, effective policy on sexual and reproductive health rights in sub-Saharan Africa. In an engaging analysis, Nana Poku employs expert knowledge to examine the prospects for large-scale improvements. He explores not only the full range of normative sensitivities, but also conceptual misunderstandings, legal difficulties and complex challenges of securing and maintaining adequate funding while AIDS remains a pandemic in the region. Up-to-date, succinct yet highly detailed, lucid and compelling in its diagnoses of highly complex issues, this book is a valuable, accessible study of a topic that is regional in focus but with clear global implications.

Blackstone's Statutes on Employment Law 2014-2015

"Since the creation of the United Nations in 1945, international law has sought to configure itself as a universal system. And yet, despite the best efforts of international institutions, scholars and others to assert the universal application of international law, its relevance and applicability has been influenced, if not directed, by political power. Over the past decade, discourse has tended to focus on the implications for international law of a unipolar world, characterised by US hegemony. However, that the international system may now be experiencing a tendency towards multipolarity, with various sites of power able to exert a telling influence on international relations and international law. Recent events such as Russia's excursion into Georgia, the breakdown of the Doha round of trade negotiations, the USA's questionable actions in the War on Terror, the prominence of emerging nuclear powers, China's assertions of its own interests on a global scale, and the rise of regional trading blocs, all pose significant questions for international law and the international legal order. International Law in a Multipolar World features contributions from a range of contributors including Nigel White, Michael Schmitt, Richard Burchill, Alexander Orakhelashvili and Christian Phipps, addressing some of the questions that multipolarity poses for the international legal system. The contributions to the volume

explore issues including the use of force, governance, sovereign equality, regionalism and the relevance of the United Nations in a multipolar world, considering the overarching theme of the relationship between power and law"--

Blackstone's EU Treaties and Legislation 2014-2015

The year 2000's most significant international event was, almost certainly, neither political nor military, but scientific - the announcement, in June, that the human genome had been almost totally decoded. Future generations may well see this as a major turning point, opening the way to radical changes in diagnosis, prognosis, and medical treatment. Often compared with the space programme, this vast enterprise still generates misgivings: this new power, which human beings now have, to modify the genetic heritage of living creatures raises fundamentally new ethical questions - and society as a whole will have to find the answers. In fact, the accelerating pace of scientific and technical progress seems to be reviving atavistic anxieties, some rational, others less so. Recent public-health crises, including the mad cow disease' scare, which lasted into 2000, have fuelled these fears. The public's rejection of GMOs (Genetically Modified Organisms) - verging on a crusade in some countries - tells its own story. As regards conflict, 2000 saw the Middle East peace process grind to a halt, and the Intifada resume. In Europe, the situation in Kosovo and Chechnya, both the scenes of fighting in 1999, stayed precarious. Peace and democracy did score some successes, however, particularly in Europe: the centre-left's victory in Croatia, sweeping former President Tudjman's party off the scene, the democratic party's triumph in Bosnia, and the fall of the Milosevic regime in Serbia.

Annuaire Europeen 2000/European Yearbook 2000

This volume focuses on the ethical significance of human rights, aiming at contributing to a universal culture of human rights with deep roots and wide horizons. Its purpose, scope and rationale are reflected in the three-part structure of the manuscript. Part I has a broad introductory historical, theoretical and legal character. Part II submits that an Ethics of Human Rights is best understood as an Ethics of Recognition of human worth, dignity and rights. Moreover, it is argued that human worth consists in the perfectibility of the human species, rooted in its semiotic nature, to be accomplished through the perfecting of human beings, for which the right to education is key. In Part III, the main legal and political outcomes of the Human Rights Revolution are described and answers to the most lasting and common criticisms of human rights are provided. To conclude, the human stature of the Big Five drafters of the Universal Declaration of Human Rights is profiled and the priority that should be recognized to human rights education is highlighted. Some appendices supplement the manuscript. While making a case for the high value and liberating power of the idea and ideal of human rights, objections, controversies and uncertainties are not at all overlooked and emerging issues are explored. The diversity of content of this volume meets many needs of the typical syllabus for a human rights course.
