Brillanter Physiker, revolutionärer Kosmologe, unerschütterlicher Optimist. Für Stephen Hawking bergen die Weiten des Universums nicht nur naturwissenschaftliche Geheimnisse. In seinem persönlichsten Buch beantwortet der Autor die großen Fragen des menschlichen Lebens und spricht die wichtigsten Themen unserer Zeit an. Zugänglich und klar erläutert er die Folgen des menschlichen Fortschritts - vom Klimawandel bis hin zu künstlicher Intelligenz - und diskutiert seine Gefahren. Hier finden Sie Hawkings Antworten auf die Urfragen der Menschheit. Ein großer Appell an politische Machthaber und jeden Einzelnen von uns, unseren bedrohten Heimatplaneten besser zu schützen.***

## **Othello, der Mohr von Venedig**

***Stem-cell research. Cloning. Genetic engineering. Today, discoveries in biotechnology are occurring so rapidly that we can barely begin to address one ethical debate before another looms overhead. This brave new world we've entered is a daunting one as well, with disturbing implications for the sanctity of life and for human nature itself. How should we respond as Christians? Drawing on an abundance of cutting-edge information and life experience, Joni Eareckson Tada and Nigel M. de S. Cameron help you think through issues no Christian can afford to ignore. As a quadriplegic who has spent three decades advocating for the disability community out of a wheelchair, Joni offers the insights of a woman intimately acquainted with suffering and struggle. Dr. Cameron shares from his vast knowledge as one of today's foremost bioethics. Together, they offer deeply informed perspectives on such pressing issues as Human cloning Designer babies Redefining human nature Human harvesting Here is thoughtful, passionate, and gripping reading about the world that is coming—that, indeed, is already here—and how to live out your faith with conviction in its midst.***

## **Brave New World?**

***One of the key issues facing us in the next millennium is the ability to manipulate the genetics of living organisms. The possibility of manipulating human genetics raises many theological, ethical and socio-political issues. These include specific decisions about whether the technology will be developed, how it will be applied and more general questions about the technical manipulation of 'natural' processes. From a theological perspective***

*the human genome project not only challenges particular doctrines, such as that of creation, eschatology and anthropology, but also raises particular issues of social justice and medical ethics. The purpose of this book is to bring together the collective expertise of theologians, scientists and social scientists in order to provide a forum for critique and public debate focused on the human genome project. It is hoped that the results presented in this book offer a sophisticated theological and ethical response.*

### **Die Erklärung der Menschen- und Bürgerrechte**

*European union movements played a central role in promoting a "European model of society", a humane industrial relations system, high labor standards, generous welfare states, and collective political representation which reached its pinnacle in the post-World War II era. The recent shift to lower growth, rising unemployment, renewed European integration, neo-liberalism, and globalization has challenged this "European Model" and the unions' place in it. These essays, written by some of the leading scholars in the field, examine responses of six major European union movements to the dramatic changes in economic and political conditions in the last two decades. They are the result of a group research effort and are based on a common framework which lends it quite an exceptional coherence.*

*The Media Creates Us in Its Image and Other Essays on Technology and Culture proposes that modern technology seriously influences every aspect of culture and personality. Technology shapes our beliefs and values and even how we think of ourselves. It affects religion, morality, education, language,*

*communication, and sexual identity. Every institution, every organization, is brought under its purview. This book attempts to awaken the reader to the destructive side of modern technology that exists side-by-side with its constructive side. What modern technology is destroying, however, is the very meaning of being human. The essay "The Media Creates Us in Its Image" makes this case most dramatically. The book asks the reader the following question: Is what you have gained from the use of modern technology more important than what you have lost? How do we once again bring technology under our control in the face of its inexorable "progress"?*

### **How to Be a Christian in a Brave New World**

*Role Theory: Expectations, Identities, and Behaviors presents the applications of role concepts for education, social work, and clinical practice. This book examines the advantages as well as the shortcomings of the role stance. Organized into nine chapters, this book begins with an overview of behaviors that are characteristics of persons within contexts and the various processes that are employed to explain and predict those behaviors. This text then examines the concepts of the role field and discovers their applications to social problems of pressing concern. Other chapters consider the empirical evidence that has been developed within the role orientation concerning social problems. This book discusses as well the behavioral comparability, behavior linkage, behavioral effects, and complex linking concepts for behaviors. The final chapter discusses how contexts may affect the behaviors of persons and how those behaviors may have subsequent functions. This book is a valuable resource for anthropologists, sociologists, and social psychologists.*

## **Brave New World**

*In his 1932 classic dystopian novel, Brave New World, Aldous Huxley depicted a future society in thrall to science and regulated by sophisticated methods of social control. Nearly thirty years later in Brave New World Revisited, Huxley checked the progress of his prophecies against reality and argued that many of his fictional fantasies had grown uncomfortably close to the truth. Brave New World Revisited includes Huxley's views on overpopulation, propaganda, advertising and government control, and is an urgent and powerful appeal for the defence of individualism still alarmingly relevant today.*

**If Chairman Mao came back to life today, what would he think of Nanjings bookstore, the Librairie Avant-Garde, where it is easier to find primers on Michel Foucaults philosophy than copies of the Little Red Book? What does it really mean to order a latte at Starbucks in Beijing? Is it possible that Aldous Huxley wrote a novel even more useful than Orwells 1984 for making sense of post-Tiananmen Chinaor post-9/11 America?In these often playful, always enlightening "tales," Jeffrey N. Wasserstrom poses these and other questions as he journeys from 19th-century China into the future, and from Shanghai to Chicago, St. Louis, and Budapest. He argues that simplistic views of China and Americanization found in most soundbite-driven media reports serve us poorly as we try to understand Chinas place in the current world orderor our own.**

## **Oh Brave New World**

**There are things that can be done and are done to life on earth (whether it be human, animal or plant life) which, even if they do not involve or produce any suffering, are still considered morally wrong by a large proportion of the public. Such things include changing the nature of living beings by means of genetic engineering in order to enhance their health, or, more likely with animals and plants, their utility, or impairing their ability to live autonomously, or unduly instrumentalizing them. Yet many scientists are puzzled about the unwillingness of the public to feel much enthusiasm about a technology that, in their view, promises great benefits to humans and does not seem to cause more harm to animals than other practices which most of us do not question at all. In this book Michael Hauskeller takes public fears seriously and offers the idea of 'biological integrity' as a clarifying principle which can then be analyzed to show that seemingly irrational public concerns about genetic engineering are not so irrational after all and that a philosophically sound justification of those concerns can indeed be given.**

***Peter the Rock is a series of studies of basic Christianity based on the New Testament accounts of Peter in the Gospels, Acts, and Letters. Because his stories are in all four Gospels, Acts, in Paul's Letters, and with First and Second Peter in the New Testament, Peter provides a fascinating avenue for lacing together the New Testament with all its variety. Conversion, discipleship, servanthood and leadership, failure and recovery . . . Simon Peter has lessons for us in each area. His story cuts across the New Testament more than any other figure except for Jesus Christ. He is far from perfect, an ordinary man in so many ways. We can relate. But God does extraordinary things through Peter. Uses: —great, widely-tested, proven material for adult education and small group study; good questions at end of each chapter —study resource for preachers and teachers —alternative perspectives for New Testament scholars to think about***

### **Brave New World by Aldous Huxley (Book Analysis)**

**This book examines the debate over the domestic force of international human rights law through the U.S. Supreme Court's jurisprudence. By approaching the topic from the justices' vantage point, the analysis shows how multiple controversies are linked to the same overarching question and reveals a divide in the Court between two fundamentally different orientations toward the domestic impact of the international human rights regime.**

## **Mail and Internet Surveys**

**Essay from the year 2000 in the subject English Language and Literature Studies - Literature, grade: A, University of Kent, course: Truth in Fiction, language: English, abstract: Of all questions that Aldous Huxley's 'Brave New World' (BNW) raises, I have chosen to analyse the role of memories and past within the society described. This will lead to the questions of what the qualities of adulthood really are, and why the character of Bernard Marx doesn't feel like an adult. These themes are most present in chapter 6, but to present**

*the whole topic, I will also quote from other chapters. First of all, I will need to quickly introduce to you the perception of character and individuality in BNW. One quote summarises it all: "Characters remain constant throughout a whole lifetime", (p.80, ll. 1,2). But how is this character achieved in the first place, if there's no development? - Only through conditioning! The character is made! It's artificial, yet we cannot deny that it's there. Therefore the question should rather be: Can a character that doesn't evolve be real? Aren't development or simply change it's most important aspects? We would immediately know, what to answer, but to the inhabitants of Brave New World, even the question must seem ridiculous, because they do not celebrate individuality. Even the Alphas only have a limited amount of free will and they do not differ much from each other, neither in appearance, nor in personality. This is because their aims are all alike. As the examples of Bernard and Helmholtz show (who are both considered exceptional individuals), individuality is a mere nuisance to those living in BNW. This may be due to the fact that character has no influence on life whatsoever career and social activities are imposed on them and there is no room for choice according to one's likings. Also, to others, character doesn't matter, only the ability to consume happiness is of importance. The individualist part of the human nature is completely denied as the following quote shows: "[ ] for doing things in private. Which meant, in practice, not doing things at all.", (p.116, ll.5f).*

## **Schöne neue Welt?**

*This new book, from internationally renowned education scholar Pasi Sahlberg and his colleagues, focuses on some of the most controversial issues in contemporary education reform around the world. The authors devote a chapter to each of these "hard questions": Does parental choice improve education systems? Is there a future for teacher unions? What is the right answer to the standardized testing question? Can schools prepare children for the 21st-century workplace? Will technology save schools? Can anyone be a teacher? Should higher education be for the public good? What knowledge and skills should an educator have? Each educational change question sheds much-needed light on today's large-scale education policies and related reforms around the world. The authors focus on what makes each question globally significant, what we know from international research, and what can be inferred from benchmark evidence. The final chapter offers a model for policymakers with implications for teaching, learning, and schooling overall. "This is an impressive and engaging book. If you care about the impacts of technology, testing, and teacher education designs, then this book will stretch your thinking and challenge your assumptions." —Andy Hargreaves, Boston College "Fascinating case studies open up our imaginations and provide clues for the most sustainable pathways forward for educators in the years to come." —Dennis Shirley, Boston College "Features enlightening chapters with an international perspective for educators*

**Universities for a New World takes the Centenary of the 'Association of Commonwealth Universities' (ACU) as its point of departure in exploring what a 2009 'United Nations Educational, Scientific and Cultural Organization' (UNESCO) Report has evocatively termed an 'academic revolution' in modern**

***higher education. The book succinctly explores the rise of the ACU as the world's oldest network of universities, before focussing primarily on that protean 'revolution' in higher education provision - with a particular sampling of the diverse Commonwealth experience across the globe. Gains as well as losses are analysed through critical and interrelated essays. Transformation may have been inevitable, but progress towards greater participation rates has not always been manifested through quality provision for students or societies at large. Measuring those changes to universities is inherently challenging as transformations are still proceeding apace. The volume accordingly concludes with informed perspectives on the potential future(s) of universities in the 21st century. Paradoxically, further change is now the only constant for higher education in an era of globalisation.***
