ClinVar uses standard terms for clinical significance recommended by an authoritative source when available. These standards include: the five terms for Mendelian diseases recommended by ACMG/AMP; the terms for ...

Documentation of information | Australian Commission on Documentation is an essential component of effective communication. Given the complexity of health care and the fluidity of clinical teams, healthcare records are one

of the most important information sources available to clinicians. Undocumented or poorly documented information relies on memory and is less likely to be communicated and retained.
