SAP ERP modules are notoriously hard to configure and use effectively without a lot of practice and experience. But as *SAP ERP Financial Accounting and Controlling: Configuration and Use Management* shows, it doesn't have to be so difficult. The book takes a systematic approach that leads SAP Financial Accounting and Controlling (FICO) users step by step through configuring and using all the program's facets. This approach makes configuration complexities manageable. The book's author—SAP expert, trainer, and accountant Andrew Okungbowa—ensures that both you and your end users are up and running quickly and confidently with FICO. He also provides sound and tested procedures that ensure your implementation works without error. *SAP ERP Financial Accounting and Controlling: Configuration and Use Management* is in fact the most comprehensive and easy-to-follow SAP FICO configuration book in the market. It incorporates a hands-on approach, with hundreds of screen shots and practical examples, that allows a person without prior configuration training to make SAP FICO ready for use in the enterprise. You'll find that you don't need to be a rocket scientist to grasp the concepts explained and apply them to your work—even when the finances are complicated, such as with the ins and outs of taxes, currency conversions, or special general ledger entries such as down payments or bills of exchange. Providing an in-depth coverage of both configuration and end user procedures, the book covers most aspects of the SAP FICO certification syllabus—SAP's view of the module's key tasks and procedures—including: Configuring and using the

general ledger and accounts payable and receivable screens Configuring and completing closing procedures, asset accounting, and financial reporting Configuring global settings and enterprise variables Accounting for both profit and cost centers Creating a house bank Integrating FICO with other SAP modules Taking a jargon-free tone and providing an abundance of examples, Andrew Okungbowa provides a clear understanding of configuration techniques and the breadth of functionalities encompassed by SAP FICO. And as an accountant, Okungbowa understands the needs of end users as well as of those answering to the CIO.

This book on 'Configuring SAP Financial Accounting' in SAP S/4HANA Finance, has been published in two volumes: Volume I and Volume II. The Volume I (this book) covers: Case Study Enterprise Structure FI Global Settings I (Fields, Ledgers, Fiscal Year, Posting Period, Parallel Accounting, Integration of SAP CO with SAP FI, and Company Code Global Parameters) FI Global Settings II (Documents, Inflation Accounting and Correspondence) FI Global Settings III (Taxes including Extended Withholding Tax) G/L Accounting The Volume II covers: Case Study Accounts Receivable and Accounts Payable Contract Accounts Receivable and Payable Bank Accounting Asset Accounting Here, in Volume I, you will learn about the context and relevance of SAP HANA, SAP S/4HANA and SAP S/4HANA Finance, before actually learning the configuration of SAP Financial Accounting. This book follows a case-study approach with a story-board technique, that provides you with the required business background for a given configuration activity. Towards configuring SAP FI, you will start your learning with SAP enterprise structure focussing on SAP FI/CO organizational units, their definition and assignment. Then, you will learn about FI global settings, in great detail, spread over three Chapters. You will learn about fields, ledgers, field status variants, fiscal year and posting periods. You will also learn parallel accounting, integration of SAP Controlling with SAP FI and configuring company code global parameters. Later, you will learn about documents (document structure, document types, posting keys, screen variants, document change rules, bar code entry, tolerance groups, summarization, default values, business transaction types, recurring entries, document parking and document archiving) besides inflation accounting and correspondence. Finally, in FI global settings, you will learn taxes: the tax on sales and purchases, the settings required for calculation / posting and interfacing your SAP system with external tax application (Vertex). You will also learn about withholding tax, including extended withholding tax: the configuration settings and how to manage withholding tax changeover. You will also learn SAP G/L Accounting, in great

detail, covering the preparations required for creating the master data including chart of accounts, account groups, sample accounts etc. You will learn how to create / process G/L accounts, besides understanding the configuration towards business transactions like document splitting, cross-company code transactions, open item clearing, balance interest calculation, closing operations, and preparing for 'going live'. As with my other books on SAP, this book also follows a case-study approach to make your learning easy. Efforts have been taken, throughout the book, to guide you step-by-step in understanding how to configure your SAP system, to meet your exact business needs. Each configuration activity has been discussed with appropriate screen shots (from an SAP system) and illustrations to help you 'see' what is being discussed in that activity / step. You will see a lot of additional information, provided across the Chapters and the Sections, to help you understand a topic or a configuration setting or a concept better. The entire content of the book, vide various Chapters, has been presented as in SAP IMG (Implementation Guide), for easy comprehension. You will come across with appropriate menu paths and Transactions, to help you to navigate the various activities. In all, you can use this book as a desktop-reference for configuring SAP FI. As the Chapters have been progressively elaborated, you will certainly find this as informative and easy to comprehend.

This book constitutes the proceedings of the International Conference on ENTERprise information systems, held Viana do Castelo, Portugal, in October 2010.

This volume contains papers selected for presentation at the 6th IAPR Workshop on Document Analysis Systems (DAS 2004) held during September 8-10, 2004 at the University of Florence, Italy. Several papers represent the state of the art in a broad range of "traditional" topics such as layout analysis, applications to graphics recognition, and handwritten documents. Other contributions address the description of complete working systems, which is one of the strengths of this workshop. Some papers extend the application domains to other media, like the processing of Internet documents. The

peculiarity of this 6th workshop was the large number of papers related to digital libraries and to the processing of historical documents, a taste which frequently requires the analysis of color documents. A total of 17 papers are associated with these topics, whereas two years ago (in DAS 2002) only a couple of papers dealt with these problems. In our view there are three main reasons for this new wave in the DAS community. From the scientific point of view, several research fields reached a thorough knowledge of techniques and problems that can be effectively solved, and this expertise can now be applied to new domains. Another incentive has been provided by several research projects funded by the EC and the NSF on topics related to digital libraries.

Knowledge and Technology Adoption, Diffusion, and Transfer: International Perspectives is filled with original scientific and quality research articles on management information systems, technology diffusion, and business systems application aspects

of e-commerce, e-government, and mobile application. As a forum of multi-disciplinary and interdisciplinary dialogue, it addresses research on all aspects of innovation diffusion in the field of business computing technologies and their past, present, and future use. This title serves as a vital source of information for researchers and practitioners alike.

This book constitutes the refereed proceedings of the 27th European Conference on Information Retrieval Research, ECIR 2005, held in Santiago de Compostela, Spain in March 2005. The 34 revised full papers presented together with 2 invited keynote papers and 17 selected poster papers were carefully reviewed and selected from 124 papers submitted. The papers are organized in topical sections on peer-to-peer, information retrieval models, text summarization, information retrieval methods, text classification and fusion, user studies and evaluation, multimedia retrieval, and Web information retrieval.

This book presents contemporary empirical methods in software engineering related to the plurality of research methodologies, human factors, data collection and processing, aggregation and synthesis of evidence, and impact of software engineering research. The individual chapters discuss methods that impact the current evolution of empirical software engineering and form the backbone of future research. Following an introductory chapter that outlines the background of and developments in empirical software engineering over the last 50 years and provides an overview of the subsequent contributions, the remainder of the book is divided into four parts: Study Strategies (including e.g. guidelines for surveys or design science); Data Collection, Production, and Analysis (highlighting approaches from e.g. data science, biometric measurement, and simulation-based studies); Knowledge Acquisition and Aggregation (highlighting literature research, threats to validity, and evidence aggregation); and Knowledge Transfer (discussing open science and knowledge transfer with industry). Empirical methods like experimentation have become a powerful means of advancing the field of software engineering by providing scientific evidence on software development,

operation, and maintenance, but also by supporting practitioners in their decision-making and learning processes. Thus the book is equally suitable for academics aiming to expand the field and for industrial researchers and practitioners looking for novel ways to check the validity of their assumptions and experiences. Chapter 17 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.
