Medical-Surgical Nursing - E-Book Nurse Anesthesia - E-Book

Practical Guide to Moderate Sedation/Analgesia In retrospect, the dosage of IV sedatives used in the early days of endoscopy both in the USA and Great Britain was frequently too high. Today we are much more careful in the way we sedate patients being acutely aware of the fact that if the patient becomes unresponsive and verbal contact is lost then, by definition, a general anaesthetic has just been administered with all the clinical and legal implications that this holds. This expertly written book examines all aspects of conscious sedation and will be an essential reference for nurses and other health professionals involved in the clinical care of patients undergoing diagnostic or therapeutic procedures that require conscious sedation. Each chapter covers a particular area of the practice of conscious sedation and the authors come from a wide spectrum of clinical specialities.

Nursing Interventions Classification (NIC) - E-Book The Pediatric Procedural Sedation Handbook provides a comprehensive but concise review of the essential information needed to allow for the safe practice of pediatric procedural sedation. Written by a group of multidisciplinary authors, this text explores the fundamentals of sedation, procedural sedation, special patient considerations, diagnostic and therapeutic procedures, and more. Each chapter offers a starting point and suggestions for further in-depth study of all aspects of providing safe, effective, multidisciplinary-team based sedation care for children undergoing testing and procedures outside of an operating room setting. Appendices providing medication dosing and delivery route suggestions complement the text and can be used for quick reference. This book is a must-read for any clinician involved in modern, team-based patient-centered care, including physicians, nurses, dentists, and child life specialists. Editors and authors are members of the Society of Pediatric Sedation, a multidisciplinary society dedicated to the advance of pediatric sedation by promoting safe, high quality care, innovative research, and quality professional education.

Johns Hopkins Manual of Gastrointestinal Endoscopic Procedures With a new focus on evidence-based practice, the 3rd edition of this authoritative reference covers every aspect of infusion therapy and can be applied to any clinical setting. Completely updated content brings you the latest advances in equipment, technology, best practices, guidelines, and patient safety. Other key topics include quality management, ethical and legal issues, patient education, and financial considerations. Ideal as a practical clinical reference, this essential guide is also a perfect review tool for the CRNI examination. Authored by the Infusion Nurses Society, this highly respected reference sets the standard for infusion nursing practice. Coverage of all 9 core areas of INS certification makes this a valuable review resource for the examination. Material progresses from basic to advanced to help new practitioners build a solid foundation of knowledge before moving on to more advanced topics. Each chapter focuses on a single topic and can serve as a stand-alone reference for busy nursing professionals. Expanded coverage of infusion therapy equipment, product selection, and evaluation help you provide safe, effective care. A separate chapter on infusion therapy across the continuum offers valuable guidance for treating patients with infusion therapy needs in outpatient, long-term, and home-care, as well as hospice and ambulatory care centers.

Extensive information on specialties addresses key areas such as oncology, pain management, blood components, and parenteral nutrition. An evidence-based approach and new Focus on Evidence boxes throughout the book emphasize the importance of research in achieving the best possible patient outcomes. The user-friendly design highlights essential information in handy boxes, tables, and lists for quick access. Completely updated coverage ensures you are using the most current infusion therapy guidelines available.

Berry & Kohn's Operating Room Technique - E-Book Awarded second place in the 2018 AJN Book of the Year Awards in Medical-Surgical Nursing! Healthcare is evolving at an incredible pace and with it, the roles and responsibilities of the medical-surgical nurse. Ensure you are fully equipped to thrive and adapt in this ever-changing nursing environment with Ignatavicius, Workman, and Rebar's Medical-Surgical Nursing: Concepts for Interprofessional Collaborative Care, 9th Edition. This trendsetting text not only covers all essential adult health knowledge, but also reinforces the application, conceptual thinking, and clinical judgment skills that today's nurses need to stay one step ahead in delivering exceptional patient care, no matter the environment. As with previous "Iggys" editions, you'll find a unique collaborative care approach to adult health nursing, a thorough integration of OSEN competencies, extensive NCLEX® Exam preparation, and a direct, reader-friendly tone throughout the text. This ninth edition incorporates two emerging and complementary trends — the Core Competencies for Interprofessional Collaborative Practice and a more conceptual approach teaching and learning — areas that will ground you in how to think like a nurse and how to apply the knowledge you gain from the text to clinical practice. There are a lot of med-surg nursing texts out there, but there's only one that combines all the information, concepts, and on-the-job realities in a way that makes perfect sense: "Iggys!" Trendsetting OSEN integration emphasizes patient safety and evidence-based practice with Nursing Safety Priority boxes, including Drug Alerts, Critical Rescues, and Action Alerts. UNIQUE! Emphasis on clinical judgment helps you develop skills in clinical reasoning and clinical decision-making when applying concepts to clinical situations. Strong emphasis on NCLEX Exam preparation includes chapter-opening Learning Outcomes and chapter-ending Get Ready for the NCLEX Examination! sections organized by NCLEX Client Needs Categories, plus NCLEX Examination Challenge

questions, with an answer key in the back of the book and on the Evolve companion website. Exceptionally readable content features shorter sentences, straightforward vocabulary, and a direct, reader-friendly writing style.

Infusion Nursing - E-Book Diagnostic and invasive procedures performed outside of the operating room with nurse-administered procedural sedation are increasing. As procedural sedation practice national guidelines are evolving, there are inconsistent state regulations and a great deal of variability in staff training. These challenges lead to potential knowledge gaps and practice variation that create unsafe patient environments. A local hospital has continued to experience near miss events when procedural sedation is administered. In an attempt to investigate this issue and create improved practice, an organizational policy analysis was conducted. The aims of

this project were to: 1) analyze current hospital policy content compared with AORN's Guideline for Care of the Patient Receiving Moderate Sedation/Analgisia; 2) propose policy changes based on content gaps and barrier analysis; 3) assess current team members' knowledge with hospital policy for procedural sedation patient monitoring and knowledge of common procedural sedation medications; and 4) develop a plan for implementing policy changes and knowledge deficits identified. The Knowledge to Action framework activation cycle was used to guide policy analysis and practice change. The institution's Procedural Sedation Committee served as the discussion forum and decision making body regarding policy change. A staff survey yielded information specific to medication knowledge and procedural sedation. Policy analysis identified the following gaps in the organizational policy: a lack of objective patient assessment scoring for discharge readiness; the need for potential extended recovery times for specific patient populations; patient monitoring with capnography; pre-procedural patient education components; nurse knowledge expectations and nursing involvement in performance improvement activities. Results of the project include implementation of the Aldrete discharge readiness assessment tool, a change in policy specific to extended recovery for specific patient populations and implementation of a decision tree to determine when procedural sedation was occurring. During this project, it was discovered that additional exploration is needed regarding nurse's procedural sedation medication and practice knowledge in order to create the next intervention that will lead to best practice.

Conscious Sedation/analgesia This Book is to be used in conjunction with Sedation Certification training TO enhance SAFE AND EFFECTIVE MODERATE SEDATION for non-anesthesia providers. This course is available for purchase 24/7 in on-line, live, DVD , and facility purchase and can be accessed from any remote location and mobile devices. Always available to fit your schedule. www.sedationcertification.com Sedation Certification, is a Healthy Visions Company. Sedation Certification is the benchmark for safe and effective sedation standardization and meets all criteria for Joint Commission, DNV, AAAHC and HFAP accrediting organizations. Sedation Certification's mission is to certify that non-anesthesia sedation providers meet the standards for patient safety set by the Joint Commission and other healthcare accrediting organizations and to ensure that nurses are trained in the legal, ethical and controversial issues of moderate sedation so that they do not put their license in jeopardy. Even though, approved by the ASNA an approver by ANCC for nurse continuing education, currently Sedation Certification is not a National Certification. This comprehensive certification was developed for RN's. Through popular request it is also available to MDs, DOs, PAs, Podiatrists and Dentists CME Credits are not included. Moderate Sedation Certification is a comprehensive competency training for non-anesthesia providers for safe, effective, timely, efficient, equitable, and patient centered care through the pharmacological reduction of pain and anxiety for medical and surgical procedures. Non-anesthesia providers giving sedation are taught to give safe age-appropriate care according to the standards set by the Joint Commission, AAAHC, DNV and HFAP. Our goal is for sedation providers to achieve adequate sedation with maximum comfort and minimal risk to patients. Sedation Providers minimize negative psychological responses by providing adequate sedation, analgesia and amnesia. Decrease agitation and improve cooperation during a procedure. Provide for rapid recovery and safe discharge. Facilitate improved technical performance of the procedure. Medical Facilities increase safety and satisfaction by offering standardization across the medical institution's network of hospitals and clinics to meet accreditation competency standards. The Certified Sedation Registered Nurse (CSRN) (tm) credential is recognized by the American Association of Moderate Sedation Nurses (AAMSN). Currently CSRN is not recognized by the American Nurse Association (ANA) as a National Certification.

Standards, Recommended Practices and Guidelines, 2005 From the experts at the American Association of Critical-Care Nurses (AACN), comes the definitive resource on administering quality nursing care to critically ill patients. The 6th edition has been updated to reflect the current state of critical care nursing practice and includes new content on the AACN Synergy Model, professional care and ethical practice, and critical care patients with special needs, as well as the most current literature and clinical studies. The clear and logical format makes this book an ideal study tool for critical care nursing orientation and continuing education programs. By covering the newest content on the CCRN exam, it also serves as an important resource for nurses preparing for critical care certification. Authored by the experts at the American Association of Critical-Care Nurses. Reflects the most recent blueprint of the CCRN examination. Content spans basic to advanced levels with an emphasis on nursing practice. Organized by body system and written in a concise outline format for ease of use. Coverage of the AACN Synergy Model is featured in the new opening chapter. Professional Care and Ethical Practice is integrated into the Core Curriculum series framework. A new chapter on Critical Care Patients with Special Needs includes bariatric and geriatric patients in critical care, as well as high-risk obstetric patients. Features new content on chest tubes, liver transplantation for acute liver failure, spirituality, and spiritual aspects of care. Integrates pain as the 5th vital sign and includes JCAHO, HCFA, and AHCPH guidelines relating to pain management. Features AHRQ evidence-based practice guidelines as reference sources for practice interventions. New organization for Patient Care presents patient problems, needs, etc. in order of clinical priority. Expanded Nursing Interventions includes considerations related to patient/family education, patient transfer, and discharge planning. Nurse Anesthesia E-Book Endorsed by the Association of Radiologic and Imaging Nursing (ARIN), this first of a

kind comprehensive radiology nursing textbook fills a gap by addressing important subjects for patient care and professional issues, as well as, future possibilities affecting nursing practice. It serves as a resource to related nursing specialties, e.g. critical care, emergency or peri-anesthesia, and to radiologic technologists and physician assistants. The book could be used as one resource for studying for radiologic nursing certification. The textbook is subdivided into five sections that address advanced practice and leadership roles, clinical patient care topics, safety topics, including legal considerations, e.g. infection prevention and equipment. It includes a section with topics impacting the patient experience and a section on professional topics, e.g. cybersecurity, social media, research/outcomes, interprofessional collaboration, workplace violence and current trends in imaging. The authors include advanced practice providers, radiology nurse managers, educators, physicians, a physicist, a dentist, attorneys, a child life specialist, administrators and a social worker. Radiology diagnostic examinations and therapeutic procedures have become a more prominent part of patient care due to advances in technology and the ability of radiology to provide services that were traditionally done in surgery or not done because of limited knowledge. Many procedures are facilitated by the radiology nurse from initial consult to transfer to a hospital unit or discharge and follow-up. Nurses assess, monitor, administer sedation/other medications and respond to emergencies. They serve as educators, researchers, and resource personnel to the radiology department and in many instances, to the entire facility. Radiology nurses are real leaders. In order to keep up-to-date on new developments, nurses need new literature to support their clinical expertise and leadership. This book is an unparalleled resource, written by experts in their areas of interest.

Pharmacology and the Nursing Process This book is a comprehensive review of conscious sedation in both the inpatient and outpatient settings. The authors review guidelines and requirements for office-based conscious sedation, including medicolegal issues. Authors are among the major names in the field and are all on the faculty of the School of Medicine at the University of California, San Francisco. Highly useful as a supplemental reference to standard course books
