Science fiction, fantasy and horror movies have spawned more sequels and remakes than any other film genre. Following Volume I, which covered 400 films made 1931–1995, Volume II analyzes 334 releases from 1996 through 2016. The traditional cinematic monsters are represented—Dracula, Frankenstein, the Wolf Man, a new Mummy. A new wave of popular series inspired by comics and video games, as well as The Lord of the Rings trilogy, could never have been credibly produced without the advances in special effects technology. Audiences follow the exploits of superheroes like

Captain America, Iron Man, Spider-Man and Thor, and such heroines as the vampire Selene, zombie killer Alice, dystopian rebels Katniss Everdeen and Imperator Furiosa, and Soviet spy turned American agent Black Widow. The continuing depredations of Jason Voorhees, Freddy Krueger and Michael Myers are described. Pre-1996 movies that have since been remade are included. Entries features cast and credits, detailed synopsis, critics' reviews, and original analysis.

George Lucas was a rebel, refusing to make films in the style of the dying studio system, relentlessly pushing the technology of the day, and almost alone in understanding the potential of merchandising; but he was a rebel who built an empire. From the staggering unexpected success of the original Star Wars in 1977, when cinema attendances exceeded 20 million for the first time since 1963, through The Empire Strikes Back and Return of the Jedi, then the 'dark times', the 16 years leading to the blockbusting prequel trilogy - this is the fascinating story of how it all happened. Life-long Star Wars fan and movie journalist Brian J. Robb edited the official Star Wars magazine for a decade and visited the sets of Attack of the Clones and Revenge of the Sith in Australia (observing director George Lucas at work), as well as the famous Skywalker Ranch. He has interviewed many of the stars and crew of all six Star Wars movies.

I've written this book to help you - the soldier - kill the enemy when you get the chance and, most importantly, come back home in one piece. To achieve this aim I've covered combat training from boot camp up to the level required of a Special Forces soldier. And then gone on to add a few tricks of my own. I've done a bit of soldiering (Northern Ireland, SAS deployments, Bush Wars in Africa, life as a merc) and been in my fair share of fire-fights. I've only been wounded twice and learnt from both occasions. I'm going to use my experience to teach you to play the game. I'm not going to teach you how to survive in snowy mountains for a month with only one tea-bag or how to kill a room full of people with only a toothpick. There are plenty of books that do that

already. This book will teach you how to fight and survive war in the 21st century from the tools of the trade, to avoiding getting shot or blown-up, from surviving an interrogation to defending a position. This is a book not for the faint hearted. But then neither is war.
