Marschall Goldsmith, Bestseller-Autor und bei Forbes als einer der 5 Top-Trainer für Führungskräfte genannt Case Analyses for Abnormal Psychology, Second Edition uses case studies to explore the etiology, biology, and dynamics of psychiatric disorders in the DSM-5. This updated edition bridges advances in abnormal psychology and neuroscience in understanding mental illness. First published in 1995. The Content of Psychological Distress makes the case for focusing psychological attention on the content of people's distressing experience. The growing demand for counselling and therapy in difficult financial times has created pressure to keep work short and highly structured. This has increased reliance on set procedures and categories at the expense of the personal and specific. The book looks at the rationale for, and practical steps involved in, taking individuals' accounts of their concerns as a starting point. It treats these as a foundation on which approaches of various kinds can be laid. It considers the impact of doing so on building relationships and improving the accuracy and richness of the work undertaken. The book is illustrated with examples from general mental health and particular psychological therapies, as well as with applications to pain, intensive care, cancer, paediatrics and forensic learning difficulties. This is a timely and important book for students, trainees and practitioners that contains reflections on the historical and philosophical background to the subject. It relates what is argued to a range of existing ideas and approaches concerned with making psychological work ethical and patient-centred. New Horizon in Male-Female Relationships attempts to break new ground in the discourse on gender equality, love, happiness, and marriage. Author David Samuel Green succeeds admirably and wastes no time in tracing the evolution of human relationships. But he also puts forward new theories regarding the state of relations between males and females across the globe, including married couples. What Green's new book further accomplishes lies in its no-holds-barred exploration of matters of the heart. Specifically, the author examines methods we can employ to eliminate problems that tend to hamper our relationships, and shows us how best to get the most out of our unions, with emphasis on how "product thinking" and "egalitarianism" assist remarkably. Besides offering solutions for troubled marriages and other relationships, the book also extends several concepts that go hand in hand with love and happiness. At the same time, it becomes clear that if we want our unions and partnerships to work, we have to bring the right attitude to the table. After all, as we learn, the ingredients for a successful relationship must include compassion, forgiveness, and understanding. Western dualism is an illusion. All of reality is a dialectical unity of incarnate love understood through the condition of the possibilities of divine and human, spirit and matter, Self and Other. Incarnation offers an understanding of the Self with ethical and cultural applications. First published in 1996. Routledge is an imprint of Taylor & Francis, an informa company. Like its predecessors, Volume III of the Handbook for Teaching Introductory Psychology provides introductory psychology instructors with teaching ideas and activities that can immediately be put into practice in the classroom. It contains an organized collection of articles from Teaching of Psychology (TOP), the official journal of the Society for the Teaching of Psychology, Division 2 of the American Psychological Association. Volume III contains 89 articles from TOP that have not been included in other volumes. Another distinction between this volume and its predecessors is its emphasis on testing and assessment. The book is divided into two sections. Section One, "Issues and Approaches in Teaching Introductory Psychology," contains 52 articles on critical issues, such as: how to approach the course; understanding students' interests, perceptions, and motives; students' existing knowledge of psychology (including their misconceptions); a comparison of introductory textbooks and tips on how to evaluate them; test questions and student factors affecting exam performance; an overview of different forms of feedback; giving extra credit; and how to deal with academic dishonesty. Section Two consists of 37 articles that present demonstrations, class and laboratory projects, and other techniques to enhance teaching and learning in both the introductory, as well as advanced courses in the discipline. This section is organized so as to parallel the order of topics found in most introductory psychology textbooks. Intended for academicians who teach the introductory psychology course and/or oversee grad assistants who teach the course, all royalties of the book go directly to the Society for the Teaching of Psychology to promote its activities to further improve the teaching of psychology. This volume provides thoroughly updated guidelines for preparing and teaching an entire course in psychology. Based on best principles and effective psychological and pedagogical research, it offers practical suggestions for planning a course, choosing teaching methods, integrating technology appropriately and effectively, developing student evaluation instruments and programs, and ideas for evaluation of your own teaching effectiveness. While research-based, this book was developed to be a basic outline of "what to do" when you teach. It is intended as a self-help guide for relatively inexperienced psychology teachers, whether graduate students or new faculty, but also as a core reading assignment for those who train psychology instructors. Experienced faculty who wish to hone their teaching skills will find the book useful, too. A harmonious blend of the theoretical and practical aspects of educational psychology, this student-friendly text provides a base for the understanding of the subject. The book discusses the various aspects of growth and development, specifically during childhood and adolescence, and accords due importance to the cognitive aspect of human behaviour with elaborate text on intelligence, creativity, thinking, reasoning and problem-solving. Besides maintaining a logical progression of topics, the author has interspersed the text with examples and illustrations to provide an in-depth analysis of the subject matter. The book is ideally suited for the B.Ed. and B.A. (Education) courses but can also be a valuable reference for teachers, teacher-trainees, and practising counsellors at various levels of school education. KEY FEATURES • Cogent and coherent style of writing • Assignment problems and sample tests at the end of various chapters • Wide range of examples and over 50 illustrations to support and explain the topics discussed Cultural Psychology of Recursivity illustrates how recursivity, often neglected in the social sciences, can be an important concept for illuminating meaning-making processes. Recursivity is a fascinating though abstract concept with a wide array of often incompatible definitions. Rooted in mathematics and linguistics, this book brings recursion and recursive processes to the foreground of psychological processes. One unifying claim among the diverse chapters in this book is that recursion and recursive processes are at the core of complex social and psychological processes. Recursion is bound up with the notion of re-turning, re-examining, re-reflecting and circling back, and these processes allow for human beings to simultaneously distance themselves from the here-and-now settings (by imaging the past and future) while being immersed in them. The objective of this book is not simply to celebrate the complexity of human living, but to extend the notion of recursion, recursivity and recursive processes into the realm of social and psychological processes beyond the arenas in which these ideas have currently thrived. Cultural Psychology of Recursivity shows that in spite of the difficulty in defining recursivity, self-referencing (looping), transformation (generativity), complexity, and holism constitute its core characteristics and provide the basis for which authors in this book explore and elaborate this concept. Still, each contribution has its own unique take on recursivity and how it is applied to their phenomenon of investigation. Chapters in this book examine how recursive processes are related to and basic aspects of play and ritual, imitation, identity exploration, managing stigma, and commemorative practices. This book is intended for psychologists, sociologists, and mathematicians. Use of the book in post-graduate and graduate level of university teaching is expected in seminar format teaching occasions. In a concise and readable 16-chapter format, ESSENTIALS OF PSYCHOLOGY, 7th Edition, incorporates the most effective features of the sixth edition along with the latest and most important research findings from psychological science. Combining extensive pedagogical support with an emphasis on active learning, the text challenges students to learn by doing -- to actively participate and to think about what they are learning rather than just passively read written information. The integrated pedagogical program helps students master the material by supporting the elements of the PQ4R (Preview, Question, Read, Recite, Review, and Reflect) study system. Douglas Bernstein also shows how topics in psychology are interrelated and guides students in thinking critically -- including organizing select research studies around questions to help readers think objectively about research and results. Identity: Beyond Tradition and McWorld Neoliberalism refashions the frameworks of discussion of "who we are". In the "Introduction", co-editors Brian Michael Goss and Christopher Chavez's grand tour re-works previous concepts of identity in prelude to the volume's global reach. The first section examines the intersection of identity and mass media; to wit, non-ascriptive ideological interpolation in a right-wing British broadsheet, the rise of beur cinema as an organically European movement, and linguistic construction of foreigners in a Thai novel. The second section examines the nation and trans-nation. The discussion traverses the "Global Latino" in advertising discourse, the (practical, theoretical) conundrums inscribed in the European Union, retorts to the global construction of Italianity, implications of Spain's World Cup triumph in 2010 for the nation's unity, and the activism of expatriate Iranian bloggers. The third section of the book addresses social approaches to identity. Matchmakers who coach Israeli daters and a linguistic analysis of female teen conflict on Facebook conclude the trajectory through global sites at which identity is animated in practice, within a volume of scholarly originality grounded in the present moment. In this book, we looked at self-image from a humanistic perspective. We see it as a dynamic and complex process that compromises self-respect and self-confidence. The protagonists of this story come from a rural area. They were a group of eleventh graders from a high school in Samacá, one of the 123 towns in the state of Boyacá, Colombia. As narrators of the story, we wanted to explore, analyze, and interpret how these adolescents perceived their self-image through their life stories under a narrative inquiry method. By telling their narratives, the students could reconstruct and re-signify their reality, while showing us who they are in relation to other people and their contexts. Therefore, life stories offered us the possibility to explore students' inner and social worlds. This research study helped us increase our sensitivity to how the adolescents saw themselves as part of their rural contexts, as well as how this might affect their futures. Resumen En este libro comprendimos la auto-imagen desde una perspectiva humana. Es decir, como un proceso dinámico y complejo que se relaciona con el auto-respeto y la auto-confianza. Los protagonistas de esta historia provienen de una zona rural. Ellos son un grupo de estudiantes de grado once de un colegio localizado en Samacá, uno de los 123 municipios que conforman el departamento de Boyacá en Colombia. Como narradores de esta historia, quisimos explorar, analizar e interpretar como estos adolescentes percibían su auto-imagen a través de sus historias de vida, enmarcadas en un método narrativo. Al narrar sus historias, los estudiantes reconstruyeron y resignificaron su realidad mientras nos mostraban su relación con otras personas y su propio contexto. Estas historias de vida nos dieron la posibilidad de explorar su mundo interno y social. Incrementamos nuestra sensibilidad como investigadores y entendimos como los adolescentes se perciben en un contexto rural y las implicaciones que esto tiene para sus vidas futuras. Joel Rodriguez grew up in poverty, but through hard work, he found himself with status and money. Finally, he had what he desperately wanted as a young boy, but he felt empty.
