Guide to Reference in Medicine and Health

In the United States, over half of pregnant women receive some form of anesthesia for their deliveries; this translates into well over 2 million anesthetics per year. With this new handbook, anesthesiologists have easy access to information on how to manage patients in specific situations. Every aspect of obstetric anesthesia practice is covered, including patient evaluation, anesthesia for labor and delivery, anesthesia for cesarean delivery, management of concurrent medical problems, management of obstetric emergencies, fetal assessment, and neonatal resuscitation. Distilled, synthesized text is complemented by a generous number of tables, charts, figures and flow diagrams in an accessible handbook format. Obstetric Anesthesia is an ideal introduction to the specialty as well as an essential daily guide for obstetric patient care and management.

Handbook of Obstetric High Dependency Care

Written and edited by experts in the field, the Handbook of Clinical Anaesthesia provides all the essential practical knowledge required by anaesthetists on co-existing medical conditions, operative procedures, and techniques. It retains the concise and comprehensive nature of the third, giving readers all they need to know about each part of the FRCA syllabus in short, digestible, practical entries. The first part covers Patient Conditions; the second part covers the third Anaesthetic Factors. Each part is subdivided into chapters on each organ system, and each chapter is divided into bite-sized entries. These are in alphabetical order, and cover all common and rare conditions that anaesthetists may encounter within their practice. Avoiding prolonged discussion and multiple references, this is the ideal book to 'dip into' either for specific advice or general education, providing quick and reliable information. This is the most thorough handbook of the entire FRCA syllabus in a consistent and instructive manner. It continues to be accessible and relevant to all anaesthetists from middle grade trainee up to consultant/specialist.
