EPIE Materials Report

The Oxford Handbook of Shakespeare and Embodiment brings together 42 of the most important scholars and writing on the subject today. Extending the purview of feminist criticism, it offers an intersectional paradigm for considering representations of gender in the context of race, ethnicity, sexuality, disability, and religion. In addition to sophisticated textual analysis drawing on the methods of historicism, psychoanalysis, queer theory, and posthumanism, a team of international experts discuss Shakespeare's life, contemporary editing practices, and performance of his plays on stage, on screen, and in the classroom. This theoretically sophisticated yet elegantly written Handbook includes an editor's Introduction that provides a comprehensive overview of current debates. Collections of literary works and accompanying lessons covering conflict, autobiography, poetry, main ideas, short story, drama, subjective and objective writing, and mythology and folk tales.
Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.
Cathy Duffy draws upon her many years of home education experience, both in teaching and researching curriculum, to bring us the most thorough and useful book available on teaching teenagers at home.
The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.
