### *Draft Legislative Reform (Lloyd's) Order 2008*

*The FIRE economy – built on finance, insurance and real estate – is now the world's principal source of wealth creation. Its rise has transformed our political, economic and social landscapes, supported by a neoliberal regime that celebrates markets, profit and risk. From rising inequality and ballooning household debt to a global financial crisis and fiscal austerity, the neoliberal 'orthodoxy' has brought instability and empowered the few. Yet it remains remarkably resilient, even resurgent, in New Zealand and abroad. In 1995 Jane Kelsey set out a groundbreaking account of the neoliberal revolution in *The New Zealand Experiment*. Now she marshals an exceptional range of evidence to show how this transfer of wealth and power has been systematically embedded over three decades. Today organisations and commentators once at the vanguard of neoliberal reform, including the IMF and Financial Times journalist Martin Wolf, are warning the current model is unsustainable. A post-neoliberal era beckons. In *The FIRE Economy* Kelsey identifies the risks posed by FIRE and the barriers embedded neoliberalism presents to a progressive, post-neoliberal transformation – and urges us to act. This is a book New Zealand cannot afford to ignore.*

#### *City Bankers, 1890-1914*

*Tense, complex and fast-moving, *Manifest Destiny: Fire on the Water* is the story of a desperate battle to save a nation. When a cataclysmic Middle East nuclear war deprives the world of a third of its easily-accessible oil, prices pass \$400 a barrel as a record-cold winter bears down on the Northern Hemisphere. US President Franklin Zimmer, desperate to avoid civilian panic and economic collapse, orders the invasion of Canada to secure the rich Northern Alberta oil sands for America's exclusive use. Expecting a quick and easy victory over its northern neighbor's thinly-stretched military, the United States and much of the rest of the world are surprised as tenacious and overmatched Canadian air and naval forces—led by an aging submarine with a troubled past—take a toll on the invading US military. In Asia and Europe, countries choose sides, with the US flexing its economic muscle and Canada calling in debts from a century of international peacekeeping and foreign aid. The fate of two nations hangs in the balance as the world holds its breath.*

#### *Federal Disaster Insurance*

*OUTSIDE a gilt-lettered door on the seventeenth floor of a New York office building, a tall young man in a fur-lined coat stood shivering. Why did he shiver in that coat? He shivered because he was fussed, poor chap. Because he was rattled, from the soles of his custom-made boots to the apex of his Piccadilly hat. A painful, palpitating spectacle, he stood. Meanwhile, on the other side of the door, the business of the American branch of that famous marine insurance firm, Lloyds, of London—usually termed in magazine articles "The Greatest Gambling Institution in the World"—went on oblivious to the shiverer who approached. The shiverer, with a nervous movement, shifted his walking-stick to his left hand, and laid his right on the door-knob. Though he was not at his best, let us take a look at him. Tall, as has been noted, perfectly garbed after London taste, mild and blue as to eye, blond as to hair. A handsome, if somewhat weak face. Very distinguished—even aristocratic—in appearance Perhaps—the thrill for us democrats here of the nobility. And at this moment sadly need of a generous dose of that courage that abounds—see any book of familiar quotations—on the playing fields of Eton. Utterly destitute of the Eton or any of any brand, he pushed open the door. The click two dozen American typewriters smote upon hearing. An office boy of the dominant New York race demanded in loud indiscreet tones business there.*

## *Handbook of International Insurance*

*The draft Legislative Reform (Lloyd's) Order 2008 (ISBN 9780110834504) proposes a number of reforms in the governance of Lloyd's together with changes in certain restrictions on the operation of the Lloyd's insurance market. The Committee's assessment of the Order is based entirely on the merits of the proposed six governance reforms and two market-related reforms contained therein. These are specific to Lloyd's and have no direct connection with present conditions in financial markets. The Committee has considered the relevant tests in the Legislative and Regulatory Reform Act 2006 and carefully reviewed the consultation documents and submissions relating to the proposal. On balance, it believes that the proposed reforms will be beneficial and that the proposed replacement regulatory safeguards are adequate. The governance reforms are consistent with moves toward better governance and are balanced with appropriate safeguards. The Committee recommends that the draft Order be approved.*

### *Making Insurance Work for Microfinance Institutions*

*In this fascinating insider's account, an American woman who became an investor alleges that irresponsibility, incompetence, greed, and fraud at Lloyd's, the world's most glamorous insurance enterprise, have caused the company to lose \$12 billion in the last ten years. Lloyd's of London is not simply an insurance company; it is a society comprising thirty thousand Names (roughly 10 percent of whom are Americans)—private individuals like Elizabeth Luessenhop who accepted the risk of unlimited liability and pledged all their wealth to backing the insurance policies written by Lloyd's. The beauty was that the Names didn't have to put up any money to receive their profit share. As long as the premium calculations were sound, everybody prospered. But the 1980s were bad years for Lloyd's—and for the Names who backed its business. It was also a time when the Society of Names grew by 50 percent to cover the disastrous losses the company was beginning to incur. Risky Business, written with veteran financial writer Martin Mayer, is a detailed account of how the mismanagement of Lloyd's has affected thousands of American investors who, like Luessenhop, sought low-risk, long-term security. Luessenhop and Mayer take us inside a unique business institution and show us that the ramifications of a possible Lloyd's failure will be severe—and felt worldwide.*
