The moving story of immigration to America as told through the passionate voices and stories of those who passed through Ellis Island. On January 1, 1892, a fifteen-year-old Irish girl named Annie Moore made history when she became the first person to be processed at a new immigrant station at Ellis Island in New York Harbor. In the next 62 years more than 12 million other immigrants would follow. Many of these newcomers would be "pushed" into America--fleeing religious persecution, political

oppression, or economic hardships in their native lands. Millions of others would be "pulled" into the United States by the promise of new opportunities. Once they arrived at Ellis, they were put through the traumatic experience

Presents, in text and illustrations, an overview of the life and legend of the American cowboy. In this fascinating collection of historical vignettes, author Martin W. Sandler restores to memory important events, people, and developments that have been lost to time. Though barely known today, these are major historical stories, from Ziryab, an eighth-century black slave whose influence on music, cuisine, fashion, and manners still reverberates, to Cahokia, a 12th century city north of the Rio Grande, which at its zenith contained a population greater than any contemporary European city, to the worst peacetime maritime disaster ever, the explosion and sinking of the Sultana on the Mississippi in 1865, and the deadliest fire in U.S. history, in Peshtigo, Wis. These tales are far from trivia; they illuminate little-known American and foreign achievements, ingenuity, heroics, blunders, and tragedies that changed the course of history and resonate today.--From publisher description.

A nation in need of hope, the most powerful rocket ever launched, and the first three men to break the bounds of Earth: Apollo 8 was headed to the moon. In 1957, when the USSR launched Sputnik I, the first man-made satellite to orbit Earth, America's rival in the Cold War claimed victory on a new frontier. The Space Race had begun, and the United States was losing. Closer to home, a decade of turbulence

would soon have Americans reeling, with the year 1968 alone seeing the assassinations of Martin Luther King Jr. and Robert F. Kennedy as well as many violent clashes between police and protesters. Americans desperately needed something good to believe in, and NASA's mission to orbit Earth in Apollo 8 and test a lunar landing module was being planned for the end of the year. But with four months to go and the module behind schedule, the CIA discovered that the USSR was preparing to send its own mission around the moon — another crucial victory in the Space Race — and it was clearly time for a change of plan. In a volume full of astonishing full-color photographs, including the iconic Earthrise photo, Martin W. Sandler unfolds an incredible chapter in U.S. history: Apollo 8 wouldn't just orbit Earth, it would take American astronauts to see the dark side of the moon.

Photographs and text provide a portrait of America from 1890 through 1910. Based on a television series by the same name. Photographs and text depict various occupations in the United States between the end of the Civil War and the outbreak of World War I. The dead of an Arctic winter. Whaling ships full of men, stranded in ice. Follow three rescuers in a race against time — and all odds — in this heartpounding true adventure. In 1897, whaling in the Arctic waters off Alaska's coast was as dangerous as it was lucrative. And in that particular year, winter blasted early, bringing storms and ice packs that caught eight American whale ships and three hundred sailors off guard. Their ships locked in ice, with no means of escape, the whalers had

limited provisions on board, and little hope of surviving until warmer temperatures arrived many months later. Here is the incredible story of three men sent by President McKinley to rescue them. The mission? A perilous trek over 1,500 miles of nearly impassable Alaskan terrain, in the bone-chilling months of winter, to secure two herds of reindeer (for food) and find a way to guide them to the whalers before they starve. With the help of photographs and journal entries by one of the rescuers, Martin W. Sandler takes us on every step of their riveting journey, facing raging blizzards, killing cold, injured sled dogs, and setbacks to test the strongest of wills. Back matter includes an epilogue, further information, a time line, source notes, a bibliography, and an index.

This book brings to the management of nonprofit organizations and public sector organizations the kind of concepts that have long been applied to commercial firms. Management thinking has long been concentrated on the problems of managing commercial organizations. Authors Sandler and Hudson set out to

study the best managed nonprofit and government organizations and to determine what they did to achieve their success. The authors found that there is a close similarity between the management thinking of these organizations and that of profit-making firms. Each type of firm defined who their customers were and how to best serve them. They looked for ways of selling their particular product. They formed partnerships with other organizations in pursuit of their ultimate goals. They encouraged innovation among their workers. They diffused power down through the organizations to the lowest level possible. They created an atmosphere that made their workers feel valued. And they had extensive systems for communicating within and outside the organizations. The book develops these concepts in separate chapters and describes the organizations the authors study as examples. Sandler and Hudson are experienced writers who have produced a straightforward, non-technical work that analyzes the special problems and concerns that these organizations share and offers a set of effective organizing principles to improve their management.

Publisher Description Examines the Atlantic Ocean's role in world history over the centuries and studies the impact of the exchange of ideas, people, and goods on the world's politics, science, culture, and history. A National Book Award winner mines photographic gold to show—and tell—the story of the Great Depression. In an exquisitely curated volume of 140 full-color and black-and-white photographs, Martin W. Sandler unpacks the United States Farm Security Administration's sweeping visual record of the Great Depression. In 1935, with the nation bent under unprecedented unemployment and economic hardship, the FSA sent ten photographers, including Walker Evans, Dorothea Lange, and Gordon Parks, on the road trip of a lifetime. The images they logged revealed the daily lives of Southern sharecroppers, Dust Bowl farmers in the Midwest, Western migrant workers, and families scraping by in Northeast cities. Using their cameras as weapons against poverty and racism—and in service of hope, courage, and human dignity—these talented

photographers created not only a collective work of art, but a national treasure. Grouped into four geographical regions and locked in focus by rich historical commentary, these images—many now iconic—are history at its most powerful and immediate. Extensive back matter includes photographer profiles and a bibliography. This book offers a fascinating look into the past at some of the most important events in our country's history through the pictures stored in the Library's vast archives. Enriched with photos, this book celebrates the history of the vaqueros, Spanish-speaking cowmen of Mexico and the Southwest, and the lasting effects their roping, ranching, and riding techniques have had on modern day cowboys. A book that helps children understand one of the 20th century's most tragic conflicts answers their most basic questions about World War II.

Wer entscheidet dies? Wenn die Welt sich gegen dich wendet: Was kann ein einzelner Mensch bewirken? The exciting true story of the captancy, wreck, and discovery of the Whydah — the only pirate ship ever found — and the incredible mysteries it revealed. The 1650s to the 1730s marked the golden age of piracy, when fearsome pirates like

Blackbeard ruled the waves, seeking not only treasure but also large and fast ships to carry it. The Whydah was just such a ship, built to ply the Triangular Trade route, which it did until one of the greediest pirates of all, Black Sam Bellamy, commandeered it. Filling the ship to capacity with treasure, Bellamy hoped to retire with his bounty — but in 1717 the ship sank in a storm off Cape Cod. For more than two hundred years, the wreck of the Whydah (and the riches that went down with it) eluded treasure seekers, until the ship was finally found in 1984 by marine archaeologists. The artifacts brought up from the ocean floor are priceless, both in value and in the picture they reveal of life in that much-mythologized era, changing much of what we know about pirates. While Americans fought for freedom and democracy abroad, fear and suspicion towards Japanese Americans swept the country after Japan's sneak attack on Pearl Harbor. Culling information from extensive, previously unpublished interviews and oral histories with Japanese American survivors of internment camps, Martin W. Sandler gives an in-depth account of their lives before, during their imprisonment, and after their release. Bringing readers inside life in the internment camps and explaining how a country that is built on the ideals of freedom for all could have such a dark mark on its history, this in-depth look at a troubling period of American history sheds light on the prejudices in today's world and provides the historical context we need to prevent similar abuses of power. Tells the story of survival of the crew members of a group of whaling ships that became trapped in ice in the Arctic in 1871. Chronicles the vast movement of immigrants to the U.S., their dreams of freedom, the hardships they faced, and how they have contributed to the development of a nation. A captivating account of how photography evolved from labor-intensive daguerreotypes in the mid-1800s to one of the most popular hobbies and respected art forms in the world today documents technological developments and its effect on journalism, science, medicine, the military, and beyond. Highlights the work of 12 photographers whose photos have changed the

nation. Describes the evolving role that horses have played in the history of the United States. Almost everyone knows the photo of John F. Kennedy, Jr., as a young boy, peering out from under his father's desk in the Oval Office. But few realize that the desk itself plays a part in one of the world's most extraordinary mysteries--a dramatic tale that has never before been told in its full scope. Acclaimed historian Martin Sandler, a two-time Pulitzer Prize nominee, winner of seven Emmy Awards, and author of more than 50 books, finally brings the entire story to light. This amazing high-seas adventure encompasses the search for the Northwest Passage in the early 1800s; a renowned explorer and his crew of 128 men who vanish during an 1845 expedition; 39 incredible, heroic attempted rescue missions; a ghost ship that drifts for more than 1,200 miles; a queen's gratitude; and that famous desk. Fascinating rare photographs, paintings, engravings, and maps illustrate the book throughout. It all began when, in one of the biggest news stories of the 19th century, Sir John Franklin and his ships the Erebus and the Terror disappeared while attempting to locate the fabled Northwest Passage. At the request of Franklin's wife, Lady Jane, the first mission set out from England in hopes of finding him; many others followed in its wake, none successful. Among these was the Resolute, the finest vessel in Queen Victoria's Navy. But in 1854 it became locked in Arctic ice and was abandoned by its captain. A year later, a Connecticut whaler discovered it 1,200 miles away drifting and deserted, a 600-ton ghost ship. He and his small crew boarded the Resolute, and steered it through a ferocious hurricane back to New London, Connecticut. The United States government then reoutfitted the ship and returned it to the thankful Queen. In 1879, when the Resolute was finally retired, she had the best timbers made into a desk for then-President Rutherford B. Hayes. It is still used by U.S. presidents today one of the most celebrated pieces of furniture in the White House.
