Itasca codes all use an explicit time-marching method to solve the algebraic equations. The solution is reached after a series of computational steps. In each code, the number of steps required to reach a solution can be controlled automatically by the code or manually by the user. However, the user ultimately must determine whether the number of steps is sufficient to reach ...

This paper should be consulted before any serious modeling with a numerical modeling code such as UDEC, FLAC3D, UDEC, or 3DEC is attempted. In essence,

the approach recognizes that field data (such as in-situ stresses, material properties, and geological features) will never be known completely. It is futile to expect the model to provide design data, such as expected ...
