Volume I presents Hegel's surviving manuscripts of his introduction to the lectures and the full transcription of the first series of lectures (1822-23). These works treat the core of human history as the inexorable advance towards the establishment of a political state with just institutions-a state that consists of individuals with a free and fully-developed self-consciousness. Hegel interweaves major themes of spirit and culture-including social life, political systems, commerce, art and architecture, religion, and philosophy-with an historical account of peoples, dates, and events. Following spirit's quest for self-realization, the lectures presented here offer an imaginative voyage around the world, from the paternalistic, static realm of China to the cultural traditions of India; the vast but flawed political organization of the Persian Empire to Egypt and then the Orient; and the birth of freedom in the West to the Christian revelation of free political institutions emerging in the medieval and modern Germanic world. Brown and Hodgson's new translation is an essential resource for the English reader, and provides a fascinating account of the world as it was conceived by one of history's most influential philosophers. The Editorial Introduction surveys the history of the texts and provides an analytic summary of them, and editorial footnotes introduce readers to Hegel's many sources and allusions. For the first time an edition is made available that permits critical scholarly study, and translates to the needs of the general reader.This book documents not only the academic and music curricula offered at a distinguished seminary, but the importance of piano study from a sociological viewpoint, music making in a gendered environment, and performance opportunities available to nineteenth-century women. The Seminary attracted students from prominent families on the eastern seaboard, as well as across the nation and from foreign countries. Piano playing was the foremost musical art regularly taught at the Seminary and was regarded as one of the few public accomplishments appropriate for young women. Repertoire included current literature such as character pieces, sets of variations, fantasies, and nocturnes - the same repertoire performed in European salons and on concert stages by artists such as Henri Herz, Sigismund Thalberg, Clara Wieck, and Franz Liszt. The text is accompanied by thirty-two illustrations, sixteen musical examples, and four tables.
