European Competition Law Annual 1997

The Latin American countries, both individually and as a community, are poised to become increasingly important in the international recognition and enforcement of competition law. Recent policy developments in the region are particularly significant in light of cross-border mergers and international cartel investigations. Although this book's focus is on Latin America, its in-depth exploration of areas such as information exchange among competition authorities, compliance, settlements, and the great value and interest to competition lawyers and policymakers worldwide. Including numerous recent cases and best practice indicators, the contributors are competition authority officials, practitioners, academics and economists and include the following: • antitrust compliance programs; • competition advocacy; • bid rigging in public procurement; • predatory pricing; • use of indirect evidence in investigations; • shareholders' damages claims; • relation between competition and intellectual property; and • merger control. There are country-specific chapters on particular developments in Argentina, Brazil, Chile, Colombia, Ecuador, El Salvador, Mexico and Paraguay. Highlighting the importance of international competition regulatory cooperation, this insightful book offers both practical guidance and food for thought to lawyers at national competition authorities, corporate counsel, and other competition law practitioners and academics.

Competition in the Insurance Industry

The Theory and Practice of Investment Management

This important book examines transatlantic economic relations in the 1990s, and in particular efforts by the United States and the European Union to establish new forms of governance to cope with increasing economic interdependence.

International and Comparative Competition Law

This book addresses the lack of binding multi-lateral international agreement on cartels, through analysis of trials and failures. It also suggests strategic approaches to overcome current standstills. In addition, the book contrasts international law on cartels with inter-governmental commodity agreement which has been developed separately through international law. Through this project, the author puts forth that successful international law on cartels needs to reflect the needs of developing countries.

Project Business Management

This thorough appraisal of competition law and policy from an international and comparative perspective covers the role of different international organisations active in the area, the significance of multinational enterprises and, in particular, the differences between US and EU systems. Taking examples from regions such as Africa, the Middle East and Asia, Maher M. Dabbah looks at the law and policy in developing countries and at a regional level, the internationalisation of competition law and the doctrines of extraterritoriality, bilateral cooperation and multilateral cooperation as well as the relationship between competition and trade policy. The book should prove useful to anyone who is interested in gaining an insight into the international dimension of competition law and policy. It is written in a language and style which make such a complex topic both possible to understand and enjoyable.

Cooperation, Comity, and Competition Policy

There has been a dramatic shift towards more open, democratised, forms of innovation that are driven by networks of individual users. Users are now visibly active within all stages of the innovation process and across many types of products and services, and their influence is spreading across many sectors. They are actively engaged with firms in the co-creation of products and services, and firms can no longer control the innovation agenda. This developing phenomenon has large implications for our understanding of the management of innovation. Drawing on practice-based insights, together with theoretical approaches developed in Innovation Studies and Science and Technology Studies, this book brings together a collection of essays that examines key aspects of this emerging new model of innovation, while highlighting exciting new ideas in this area. With content contributed by academics, practitioners and researchers, this book is a good reference source for academics and public interested in the management and policy implications of user innovation. Licensing, Selling and Finance in the Pharmaceutical and Healthcare Industries is an assessment of the turbulent state of pharmaceutical and biotechnology markets as we enter the second decade of the 21st Century. At the same time, a cautionary evaluation of the future financing of innovation in terms of what's gone wrong and how to succeed in the future. Martin Austin explores the challenge that the pharmaceutical (and related) industries face in terms of balancing cost containment and expenditure control in areas such as internal research and development; whilst embracing in-licensing and the acquisition of innovative therapies to counteract their impending portfolio weaknesses in the mid-term. The first part of the book provides an engaging and convincing perspective on the context in which the industry currently finds itself; the second part is a pragmatic guide to commercialising your intellectual property; including how to protect what you have as well as the new ways of working that you will need to adopt when negotiating, collaborating and contracting in partnership and alliance with others. Commentators have described in great detail the cocktail of complex social issues that threaten to overwhelm the pharmaceutical industry; Martin Austin's book offers a very distinctive perspective on these issues and their solution.

Antitrust Law Developments (sixth)

This new Sixth Edition of a major work by the well-known competition law team at Van Bael & Bellis in Brussels brings the book up to date to take account of the many developments in the case law and relevant legislation that have occurred since the Fifth Edition in 2010. The authors have also taken the opportunity to write a much-extended chapter on private enforcement and a dedicated section on competition law in the pharmaceutical sector. As one would expect, the new edition meets the challenge for businesses and their counsel, providing a thoroughly practical guide to the application of the EU competition rules. The critical commentary cuts through the theoretical underpinnings of EU competition law to focus on its impact on business. In this comprehensive new edition, the authors examine such notable developments as the following: important rulings concerning the concept of a restriction by object under Article 101; the extensive case law on Article 102 including in relation to cartel facilitation and price signalling; important Article 102 rulings concerning pricing and exclusivity, including the Post Danmark and Intel judgments, as well as standard essential patents; the current block exemption guidelines applicable to vertical agreements, including those applicable to the motor vehicle sector; developments concerning online distribution, including the Pierre Fabre and Coty rulings; the current guidelines and block exemption on horizontal cooperation, including the treatment of information exchange; the evolution of EU merger control, including court defeats suffered by the Commission and the case law on procedural infringements; the burgeoning case law on pharmaceuticals, including concerning reverse payment settlements; the current technology transfer guidelines and block exemption; procedural developments, including in relation to the right to privacy, access to file, parental liability, methodology, inability to pay and hybrid settlements; the implementation of the Damages Directive and the first interpretative rulings. As a comprehensive, up-to-date and above all practical analysis of the EU competition rules as developed by the Commission and EU Courts, this authoritative new edition of a classic work stands alone. Like its predecessors, it will be of immeasurable value to both business persons and their legal advisers.

Cooperation Between Antitrust Agencies at the International Level

Taking advantage of liberal regulations under the current world trade regime that permit the separation of manufacturing from marketing, many pharmaceutical companies (like other companies) outsource the actual manufacture of drugs. However, because the quality of medicines is crucial to public health, the pharmaceutical industry is perhaps the most regulated of all industries. In most countries medicines are controlled prior to their marketing, and their manufacture is under strict supervision. Necessarily, numerous international initiatives have led to elaboration of standards relating to the manufacture and marketing of medicines. These standards impose stringent rules on all parties to pharmaceutical contracts. This very useful book provides a comprehensive global guide to the legal issues and procedures involved in outsourcing the manufacture of medicines. It describes the legal requirements relating to the manufacture and distribution of medicines, emphasising the impact of regulatory supervision on the rights and obligations of persons who outsource manufacturing of medicines and on those who provide the manufacturing services. The author provides detailed coverage of pertinent topics as the following: and• definition of and•medicineand• in different jurisdictions; and• categories of medicines; and• manufacturing and importation regulation in numerous jurisdictions worldwide; and• inspection regime and manufacturing practice (GMP); and• marketing authorization; and• manufacturing documentation; and• complaints and product recall; and• liability insurance; and• protection of trade secrets; and• data exclusivity and data protection; and• deficiencies and delays; and and• recognition and enforcement of judgements. A significant part of the book is devoted to cross-border problems arising from such matters as conflict of laws or taxation. Indispensable to counsel for pharmaceutical companies of any size, Contract Manufacturing of Medicines will also be of great value to practitioners and academics concerned with international trade for its precise, in-depth delineation of the inner workings of a complex and dynamic trade regime.

'National Strategies for Regional Integration: South and East Asian Case Studies' examines how each country's integration with its neighbours and more distant regional economies might be improved. The country cases illustrate the development experience and offer lessons for other countries and regions interested in developing national strategies to foster regional integration.

The Internationalisation of Competition Rules

The widespread move towards more market-driven models of political economy combined with the expanding internationalisation of business and commerce has led to a series of proposals for global competition rules. To date these proposals have been hotly contested. The purpose of this book is to investigate in some depth whether there is a rational foundation for pursuing international competition rules, and what form these laws should take. The book takes examples from examples around the world, in particular the US and the EU both of which have a long history of enforcing established competition rules.
