*Protecting the ocean could help us fight climate change Natural World and Cultural Heritage. Climate change and extreme events are already endangering the well-being of a wide range of wildlife, fish, and plants, which are intimately tied to tribal subsistence culture and popular outdoor recreation activities. Climate change ...*

*Northwest - Fourth National Climate Assessment - Global ... 22.03.2022 · Our ocean covers 70% of the world's surface and accounts for 80% of the planet's biodiversity. We can't have a healthy future without a healthy ocean - but it's more vulnerable than ever because of climate change and pollution. Tackling the grave threats to our ocean means working with leaders across sectors, from business to government to academia. The World Economic Forum...*
