Die größte Herausforderung unserer Zeit Ob selbstfahrende Autos, 3-D-Drucker oder Künstliche Intelligenz: Aktuelle technische Entwicklungen werden unsere Art zu leben und zu arbeiten grundlegend verändern. Die Vierte Industrielle Revolution hat bereits begonnen. Ihr Merkmal ist die ungeheuer schnelle und systematische Verschmelzung von Technologien, die die Grenzen zwischen der physischen, der digitalen und der biologischen Welt immer stärker durchbrechen. Wie kein anderer ist Klaus Schwab, der Vorsitzende des Weltwirtschaftsforums, in der Lage aufzuzeigen, welche politischen, wirtschaftlichen, sozialen und kulturellen Herausforderungen diese Revolution für uns alle mit sich bringt.

Seine Firma Bridgewater Associates ist der größte Hedgefonds der Welt, er selbst gehört zu den Top 50 der reichsten Menschen auf dem Planeten: Ray Dalio. Seit 40 Jahren führt er sein Unternehmen so erfolgreich, dass ihn Generationen von Nachwuchsbankern wie einen Halbgott verehren. Mit "Die Prinzipien des Erfolgs" erlaubt er erstmals einen Blick in seine sonst so hermetisch abgeriegelte Welt. Seine Beobachtungen aus dem Geschäftsleben hielt Ray Dalio schon als junger Unternehmer in einem Notizbuch fest. Das war die Geburtsstunde seiner gut 200 "Prinzipien", die mit diesem Buch erstmals gebündelt vorliegen und kaum weniger als die Essenz des geradezu unheimlichen Erfolgs von Ray Dalio und seiner Firma darstellen. Kern dieser Prinzipien ist eine stetige Verbesserung durch radikale Transparenz und Wahrhaftigkeit, eine Art "Ideen-Meritokratie", also eine Atmosphäre, in der sich die besten Ideen durchsetzen. Die einzigartigen Prinzipien, mithilfe derer jeder den Weg des Erfolgs einschlagen kann, und die mitunter harten Lektionen, die ihn sein einzigartiges System errichten ließen, hat Ray Dalio auf eine bisher noch nie dagewesene, unkonventionelle Weise zusammengetragen.

Using the theory of management fashions proposed in the 1990s by Eric Abrahamson, Krzysztof Klincewicz analyzes the changing popularity of management concepts accompanied by solutions. Among these are management bestsellers, consulting services, software systems, "methodologies," and approaches to organizational change, training courses, professional certifications and even new corporate positions. The book presents the phenomena of management fashions as being the key driver for the development of the management knowledge industry, consisting of consulting companies, computer firms, publishing houses, professional institutes, and other organizations involved in the launching and the promotion of new management techniques. The author supplements the existing body of knowledge by focusing on the supply-side of management fashions, particularly the strategies and marketing techniques of solution vendors, and proposes a model of relations between management ideas and tangible solutions, explaining how bestselling ideas are turned into objects and institutions. The empirical research described in this volume involves multiple methods, including discourse volume analysis and qualitative historical techniques. Included also is a comprehensive overview of the recent relevant developments in sociology, marketing, and organization sciences, in which the author draws on the heritage of praxiology by taking a meta-level perspective on the propositions of management science. Krzysztof Klincewicz is lecturer at the School of Management, Warsaw University, and researcher at the School of Innovation Management, Tokyo Institute of Technology. His research interests combine organization theory, social sciences, and new technologies, with the focus on strategies of high-tech companies. He is certified chartered marketer of the British Chartered Institute of Marketing, and has numerous years of working experience in business development management for IT companies in Poland, Finland, and in the UK.

Grundzüge der Volkswirtschaftslehre

This volume contains selected papers of Lawrence R Klein in economics, econometric theory and applications in modeling, forecasting, macroeconomic analysis, international economics and public policy. Nobel Laureate Lawrence Klein's bibliography spans a half-century, including books, articles, and chapters in conference proceedings, festschriften, and thematic books. One such volume of solely scientific collections, mainly from his relatively early articles, has already been published. The present volume is different, it includes some articles, but largely chapters, or book excerpts that were mostly written since

1980, the approximate cut-off date of the prior volume, and the year of his Nobel Prize. Also, it includes things that were published in very limited or obscure editions. Thus it provides a more complete picture of his scholarly career and his current reflections on the state of economic science. All these writings are in the vanguard of thinking about economics in a global domain. The thirty-five-plus selections are organized in five parts, by major themes. An editorial commentary introduces each part. The introductory chapters include Klein's autobiographical research commentary, and his professional life philosophy.

Macroeconomics 19e

"PRINCIPLES OF MACROECONOMICS, Seventh Edition, continues to be the most popular and widely-used text in the economics classroom. Instructors find it the perfect complement to their teaching. A text by a superb writer and economist that stresses the most important concepts without overwhelming students with an excess of detail was a formula that was quickly imitated, but has yet to be matched. The seventh edition features dozens of new applications that emphasize the real-world relevance of economics for today's students through interesting news articles, realistic case studies, and engaging problems. A thorough update has been made to keep all chapters fresh and relevant with current Economic coverage. A new Quick Check Multiple Choice section has been included to round out the end-of-chapter offering. Intended as a deeper dive into the material than the existing Questions for Review, these Quick Check Multiple Choice Questions and Problems and Applications will be directly lifted into the Mankiw Aplia product. Aplia, the best-selling online homework solution, will be available with new enhancements that include accessibility on mobile devices, improved graphing experience, a new interactive ereader with videos and graphing tutorials, and much more. The seventh edition premier ancillary package is the most extensive in the industry, using a team of instructors/preparers that have been with the project since the first edition"--Provided by publisher.

When it comes drawing on enduring economic principles to explain current economic realities, there is no one readers trust more than Paul Krugman. With his bestselling introductory textbook (now in a new edition) the Nobel laureate and New York Times columnist is proving to be equally effective in the classroom, with more and more instructors in all types of schools using Krugman's signature storytelling style to help them introduce the fundamental principles of economics to all kinds of students.

Learning and Expectations in Macroeconomics

A crucial challenge for economists is figuring out how people interpret the world and form expectations that will likely influence their economic activity. Inflation, asset prices, exchange rates, investment, and consumption are just some of the economic variables that are largely explained by expectations. Here George Evans and Seppo Honkapohja bring new explanatory power to a variety of expectation formation models by focusing on the learning factor. Whereas the rational expectations paradigm offers the prevailing method to determining expectations, it assumes very theoretical knowledge on the part of economic actors. Evans and Honkapohja contribute to a growing body of research positing that households and firms learn by making forecasts using observed data, updating their forecast rules over time in response to errors. This book is the first systematic development of the new statistical learning approach. Depending on the particular economic structure, the economy may converge to a standard rational-expectations or a "rational bubble" solution, or exhibit persistent learning dynamics. The learning approach also provides tools to assess the importance of new models with expectational indeterminacy, in which expectations are an independent cause of macroeconomic fluctuations. Moreover, learning dynamics provide a theory for the evolution of expectations and selection between alternative equilibria, with implications for business cycles, asset price volatility, and policy. This book provides an authoritative treatment of this emerging field, developing the analytical techniques in detail and using them to synthesize and extend existing research.
