This book provides a clear and lively account of how relations between Russia and America after World War Two fell into a Cold War. Assessing both the clash of ideas and personalities which brought about this confrontation the book

Peacekeeping has gradually evolved to encompass a broad range of different conflict management missions and techniques, which are incorporated under the term "peace operations." Well over 100 missions have been deployed, the vast majority within the last twenty years. This book provides an overview of the central issues surrounding the development, operation, and effectiveness of peace operations. Among many features, the book: Traces the historical development of peace operations from their origins in the early 20th century through the development of modern peacebuilding missions. Tracks changes over time in the size, mission, and organization of peace operations. Analyses different organizational, financial, and troop provisions for peace operations, as well as assessing alternatives. Lays out criteria for evaluating peace operations and details the conditions under which such operations are successful. As peace operations become the primary mechanism of conflict management used by the UN and regional organizations, understanding their problems and potential is essential for a more secure world. Drawing on a wide range of examples from those between Israel and her neighbors to more recent operations in Somalia and the Congo, this book brings together the body of scholarly research on peace operations to address those concerns. It will be an indispensable guide for students, practitioners and general readers wanting to broaden their knowledge of the possibilities and limits of peace operations today.

The summation of more than two thousand years of one of the world's most august literary traditions, this volume also represents the achievements of four hundred years of Western scholarship on China. The selections include poetry, drama, fiction, songs, biographies, and works of early Chinese philosophy and history rendered in English by the most renowned translators of classical Chinese literature: Arthur Waley, Ezra Pound, David Hawkes, James Legge, Burton Watson, Stephen Owen, Cyril Birch, A. C. Graham, Witter Bynner, Kenneth Rexroth, and others. Arranged chronologically and by genre, each chapter is introduced by definitive quotes and brief introductions chosen from classic Western sinological treatises. Beginning with discussions of the origins of the Chinese writing system and selections from the earliest "genre" of Chinese literature--the Oracle Bone inscriptions--the book then proceeds with selections from: • early myths and legends; • the earliest anthology of Chinese poetry, the Book of Songs; • early narrative and philosophy, including the I Ching, Tao-te Ching, and the Analects of Confucius; • rhapsodies, historical writings, magical biographies, ballads, poetry, and miscellaneous prose from the Han and Six Dynasties period; • the court poetry of the Southern Dynasties; • the finest gems of Tang poetry; and • lyrics, stories, and tales of the Sui, Tang, and Five Dynasties eras. Special highlights include individual chapters covering each of the luminaries of Tang poetry: Wang Wei, Li Bo, Du Fu, and Bo Juyi; early literary criticism; women poets from the first to the tenth century C.E.; and the poetry of Zen and the Tao. Bibliographies, explanatory notes, copious illustrations, a chronology of major dynasties, and two-way romanization tables coordinating the Wade-Giles and pinyin transliteration systems provide helpful tools to aid students, teachers, and general readers in exploring this rich tradition of world literature.

If the Cold War is really over, why is the United States still spending near record high amounts of money on defense? Now that we no longer fear war with another global superpower, why are we putting U.S. troops in harm's way all over the globe? After the President and Congress pledged to shift our focus from international to domestic issues, why aren't we converting more economic resources away from the military infrastructure to meet human needs at home? The answers to these questions, asserts Sam Marullo, lie in the institutional structures created over the last four decades and still in operation today. Despite the fall of the Berlin Wall and the rise of independent Soviet states, the United States' Cold War political, cultural, economic, and military infrastructure remain virtually unchanged. After unveiling the individual and organizational values which support the Cold War's defense industry, government agencies, media, language, and ideology, Marullo proposes reforms to end our domestic Cold War. His recommendations include increasing Congressional oversight and civilian involvement in foreign and military policy making, strengthening The Arms Control and Disarmament Agency, the U.S. Peace Institute, and other peace keeping institutions, declassifying government documents and weapons development, introducing peace education into the schools, and bolstering the authority of the World Court, the United Nations, and international law. Only by changing our attitudes and the ways our institutions operate, can we finally win the Cold War.

In *Bridging the Gap* scholar and military officer Cindy R. Jebb asks why the United States, with its considerable diplomatic, economic, and military resources vested in the Middle East, has not been able to successfully implement plans to quell unrest in the region. To find an answer, Jebb specifically focuses on the factors that drive United States' foreign policy decisions in Egypt and Syria in a Cold War and post-Cold War context. The epilogue brings forward the post-Cold War findings to a post 9/11 world, providing insights on the changing legitimacy formulas for both states. Using comparative politics literature to answer the international relations question of why states behave as they do, this searching study builds an important foundation for further research in other critical areas of current scholarly interest, including democratization, consensus-building, multilateral institutions, and ethnic studies. *Bridging the Gap* will be indispensable to scholars in the international, comparative, and security fields, and Jebb's insights will be of particular value to Middle East regional experts and policy makers.
