Measurement, Instrumentation, and Sensors Handbook, Second

Flow measurement has a history of about 3000 years. It has been studied only in the last 200 years and in the last 30 years all the new techniques have evolved. There is now a wide variety of methods available to measure the flow of liquids, solids, gases and vapours. From the flow of a cupful of liquid to the equivalent to a large river, can be measured. The cost to measure flow ...
